

CURRICULUM

NURSING EDUCATION

**Placement: 1st
Year**

**Hours of nstruction
Theory 150 Hours
Practical 150 ours
Total: 300 Hours**

Course Description

This course is designed to assist students to develop a broad understanding of Fundamental Principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

Objectives

At the end of the course, students will be able to:

1. Explain the aims of education, philosophies, trends in education and health: its impact on nursing education.
2. Describe the teaching learning process.
3. Prepare and utilize various instructional media and methods in teaching learning process.
4. Demonstrate competency in teaching, using various instructional strategies.
5. Critically analyze the existing nursing educational programs, their problems, issues and future trends.
6. Describe the process of curriculum development, and the need and methodology of curriculum change, innovation and integration.
7. Plan and conduct continuing nursing education programs.
8. Critically analyze the existing teacher preparation programs in nursing.
9. Demonstrate skill in guidance and counseling.
10. Describe the problems and issues related to administration of nursing curriculum including selection and organization of clinical experience.

11. Explain the development of standards and accreditation process in nursing education programs.
12. Identify research priorities in nursing education.
13. Discuss various models of collaboration in nursing education and services.
14. Explain the concept, principles, steps, tools and techniques of evaluation
15. Construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude

Course Content:

Units	Hours		Course Content
	Theory	Practical	
I	10	12	<p>Introduction :</p> <ul style="list-style-type: none"> • Education :Definition, aims, concepts, philosophies & their education implications, • Impact of Social, economical, political & technological changes on education: <p>- Professional education -Current trends and issues in education -Educational reforms and National Educational policy, various educational commissions-reports -Trends in development of nursing education in India</p>
II	20	30	<p>Teaching – Learning Process</p> <ul style="list-style-type: none"> • Concepts of teaching and learning: Definition, theories of teaching and learning, relationship between teaching and learning. • Educational aims and objectives; types, domains, levels, elements and writing of educational objectives • Competency based education(CBE) and outcome based education(OBE) • Instructional design: Planning and designing the lesson, writing lesson plan : meaning, its need and importance, formats. • Instruction strategies – Lecture, discussion, demonstration, simulation, laboratory, seminar, panel, symposium, problem solving, problem based learning (PBL), workshop, project, role- play(socio- drama), clinical teaching methods, programmed instruction, self directed learning(SDL), micro teaching, computer assisted instruction (CAI), computer assisted learning (CAL)

Units	Hours		Course Content
	Theory	Practical	
III	10	10	Instructional media and methods <ul style="list-style-type: none"> • Key concepts in the selection and use of media in education • Developing learning resource material using different media • Instructional aids – types, uses, selection, preparation, utilization. • Teacher’s role in procuring and managing instructional Aids – Project and non-projected aids, multi media, video-tele conferencing etc
IV	10	6	Measurement and evaluation: <ul style="list-style-type: none"> • Concept and nature of measurement and evaluation, meaning, process, purposes, problems in evaluation and measurement. • Principles of assessment, formative and summative assessment- internal assessment external examination, advantages and disadvantages. • Criterion and norm referenced evaluation,
V	12	10	Standardized and non-standardized tests : <ul style="list-style-type: none"> • Meaning, characteristics, objectivity, validity, reliability, usability, norms, construction of tests- <ul style="list-style-type: none"> • Essay, short answer questions and multiple choice questions. • Rating scales, checklist, OSCE/OSPE(Objective structured clinical/practical examination) • Differential scales, and summated scales, sociometry, anecdotal • Question bank-preparation, validation, moderation by panel, utilization • Developing a system for maintaining confidentiality
VI	8	5	Administration, Scoring and Reporting <ul style="list-style-type: none"> • Administering a test; scoring, grading versus marks • Objective tests, scoring essay test, methods of scoring, Item analysis.
VII	12	6	Standardized Tools <ul style="list-style-type: none"> • Tests of intelligence aptitude, interest, personality, achievement, socio-economic status scale, tests for special mental and physical abilities and disabilities.

Units	Hours		Course Content
	Theory	Practical	
VIII	5	6	<p>Nursing Educational programs</p> <ul style="list-style-type: none"> • Perspectives of nursing education: Global and national. • Patterns of nursing education and training programmes in India. Non-university and University programs: ANM, GNM, Basic B.Sc. Nursing, Post Certificate B.Sc. Nursing, M.Sc(N) programs, M.Phil and Ph.D) in Nursing, post basic diploma programs, nurse practitioner programs.
IX	12	25	<p>Continuing Education in Nursing</p> <p>concepts Definition, importance, need scope, principles of adult learning, assessments of learning needs, priorities, resources.</p> <ul style="list-style-type: none"> • Program planning, implementation and evaluation of continuing education programs. • Research in continuing education. • Distance education in nursing.
X	10	10	<p>Curriculum Development</p> <ul style="list-style-type: none"> • Definition, curriculum determinants, process and steps of curriculum development, Curriculum models, Types and framework. • Formulation of philosophy, objectives, selection and organization of learning experiences; master plan, course plan, unit plan. • Evaluation strategies, process of curriculum change, role of students, faculty, administrators, statutory bodies and other stakeholders. • Equivalency of courses: Transcripts, credit system.
XI	6	5	<p>Teacher preparation</p> <ul style="list-style-type: none"> • Teacher – roles & responsibilities, functions, characteristics, competencies, qualities, • Preparation of professional teacher • Organizing professional aspects of teacher preparation programs • Evaluation: self and peer • Critical analysis of various programs of teacher education in India.

Units	Hours		Course Content
XII	10	5	Guidance and counseling <ul style="list-style-type: none"> • Concept, principles, need, difference between guidance and counseling , trends and issues. • Guidance and counseling services : diagnostic and remedial. • Coordination and organization of services. • Techniques of counseling : Interview, case work, characteristics of counselor, problems in counseling. • Professional preparation and training for counseling.
XIII	10	10	Administration of Nursing Curriculum <ul style="list-style-type: none"> • Role of curriculum coordinator – planning, implementation and evaluation. • Evaluation of educational programs in nursing- course and program. • Factors influencing faculty staff relationship and techniques of working together. • Concept of faculty supervisor (dual) position. • Curriculum research in nursing. • Different models of collaboration between education and
XIV	10	5	Management of nursing educational institutions <ul style="list-style-type: none"> • Planning, organizing, staffing, budgeting, recruitment, discipline, public relation, performance appraisal, welfare services, library services, hostel,
XV	5	5	<ul style="list-style-type: none"> • Development and maintenance of standards and accreditation in nursing education programs. • Role of Indian Nursing Council, State Registration Nursing Councils, Boards and University. • Role of Professional associations and unions.

Activities :

- Framing philosophy, aims and objectives.
 - Lesson Planning.
 - Micro teaching-2.
 - Conduct practice teachings using different teaching strategies -10
(like lecture cum discussion, demonstration- lab method, field trips, seminars, project, role play, panel discussion, clinical methods etc)
 - Preparation and utilization of instructional Aids using different media.
 - Develop course plans, unit plans, rotation plans.
 - Conduct a continuing education workshop.
 - Annotated bibliography.
-
- Critical evaluation of any nursing education program offered by a selected institution.
 - Planning and Organizing field visits

➤ **Educational visits.**

- Field visits (INC/SNRC) to get familiar with recognition/registration process.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc)
- Observe and practice application of various non-standardized tests (intelligence, Aptitude, Personality, Sociometry, physical & mental disabilities tests.)

Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits
- Workshop

Methods of evaluation

- Tests
- Presentation
- Project work
- Written assignments

Internal Assessment

<u>Techniques</u>	<u>Weight age</u>
<i>Test- (2 tests)</i>	<i>30</i>
<i>Assignment& Seminar/presentation</i>	<i>20</i>
<i>Total</i>	<i>50</i>

Practical – Internal assessment

<i>Practice Teaching</i>	<i>30</i>
<i>Learning resource material &conducting workshop /Short Term Course</i>	<i>20</i>
<i>Total</i>	<i>50</i>

Practical – External assessment

<i>Practice teaching- 1- Preparation/use of learning resource material-/ Construction of tests/rotation plan</i>	<i>30</i>
	<i>20</i>
<i>Total</i>	<i>50</i>

ADVANCED NURSING PRACTICE

Placement: 1st Year

Hours of Instruction
Theory : 150 Hours
Practical : 250Hours
Total : 400Hours

Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

Objectives:

At the end of the course the students will be able to:

1. Appreciate and analyze the development of nursing as a profession.
2. Describe ethical, legal, political and economic aspects of health care delivery and nursing practice.
3. Explain bio- psycho- social dynamics of health, life style and health care delivery system.
4. Discuss concepts, principles, theories, models, approaches relevant to nursing and their application.
5. Describe scope of nursing practice.
6. Provide holistic and competent nursing care following nursing process approach.
7. Identify latest trends in nursing and the basis of advance nursing practice.
8. Perform extended and expanded role of nurse.
9. Describe alternative modalities of nursing care.
10. Describe the concept of quality control in nursing.
11. Identify the scope of nursing research.
12. Use computer in patient care delivery system and nursing practice.
13. Appreciate importance of self development and professional advancement.

Course Content

Unit	Hours	Content
I	10	<p>Nursing as a Profession</p> <ul style="list-style-type: none"> • History of development of nursing profession, characteristics, criteria of the profession, perspective of nursing profession-national, global. • Code of ethics(INC), code of professional conduct(INC), autonomy and accountability, assertiveness, visibility of nurses, legal considerations, <ul style="list-style-type: none"> * Role of regulatory bodies • Professional organizations and unions-self defense, individual and collective bargaining • Educational preparations, continuing education, career opportunities, professional advancement & role and scope of nursing education. • Role of research, leadership and management. • Quality assurance in nursing (INC). • Futuristic nursing.
II	5	<p>Health care delivery</p> <ul style="list-style-type: none"> • Health care environment, economics, constraints, planning process, policies, political process vis a vis nursing profession. • Health care delivery system- national, state, district and local level. • Major stakeholders in the health care system-Government, non-govt, Industry and other professionals. • Patterns of nursing care delivery in India. • Health care delivery concerns, national health and family welfare programs, inter-sectoral coordination, role of non-governmental agencies. • Information, education and communication (IEC). • Tele-medicine.
III	10	<p>Genetics</p> <ul style="list-style-type: none"> • Review of cellular division, mutation and law of inheritance, human genome project ,The Genomic era. • Basic concepts of Genes, Chromosomes & DNA. • Approaches to common genetic disorders. • Genetic testing – basis of genetic diagnosis, Pre symptomatic and predisposition testing, Prenatal diagnosis & screening, • Ethical, legal & psychosocial issues in genetic testing. • Genetic counseling. • Practical application of genetics in nursing.

Unit	Hours	Content
IV	10	Epidemiology <ul style="list-style-type: none"> - Scope, epidemiological approach and methods, - Morbidity, mortality, - Concepts of causation of diseases and their screening, - Application of epidemiology in health care delivery, Health surveillance and health informatics - Role of nurse
V	20	Bio-Psycho social pathology <ul style="list-style-type: none"> - Pathophysiology and Psychodynamics of disease causation - Life processes, homeostatic mechanism, biological and psycho-social dynamics in causation of disease, life style - Common problems: Oxygen insufficiency, fluid and electrolyte imbalance, nutritional problems, hemorrhage and shock, altered body temperature, unconsciousness, sleep pattern and its disturbances, pain, sensory deprivation. - Treatment aspects: pharmacological and pre- post operative care aspects, - Cardio pulmonary resuscitation. - End of life Care - Infection prevention (including HIV) and standard safety measures, bio-medical waste management. - Role of nurse- Evidence based nursing practice; Best practices - Innovations in nursing
VI	20	Philosophy and Theories of Nursing <ul style="list-style-type: none"> - Values, Conceptual models, approaches. - Nursing theories: Nightingale's, Henderson's, Roger's, Peplau's, Abdella's, Lewine's, Orem's, Johnson's, King's, Neuman's, Roy's, Watson's, etc and their applications, - Health belief models, communication and management, etc - Concept of Self health. - Evidence based practice model.
VIII	10	Nursing process approach <ul style="list-style-type: none"> - Health Assessment-illness status of patients/clients (Individuals, family, community), Identification of health- illness problems, health behaviors, signs and symptoms of clients. - Methods of collection, analysis and utilization of data relevant to nursing process. - Formulation of nursing care plans, health goals, implementation, modification and evaluation of care.

Unit	Hours	Content
IX	30	<p>Psychological aspects and Human relations</p> <ul style="list-style-type: none"> - Human behavior, Life processes & growth and development, personality development, defense mechanisms, - Communication, interpersonal relationships, individual and group, group dynamics, and organizational behavior, - Basic human needs, Growth and development, (Conception through preschool, School age through adolescence, Young & middle adult, and Older adult) - Sexuality and sexual health. - Stress and adaptation, crisis and its intervention, - Coping with loss, death and grieving, - Principles and techniques of Counseling.
X	10	<p>Nursing practice</p> <ul style="list-style-type: none"> - Framework, scope and trends. - Alternative modalities of care, alternative systems of health and complimentary therapies. - Extended and expanded role of the nurse, in promotive, preventive, curative and restorative health care delivery system in community and institutions. - Health promotion and primary health care. - Independent practice issues,- Independent nurse-midwifery practitioner. Collaboration issues and models-within and outside nursing. - Models of Prevention, - Family nursing, Home nursing, - Gender sensitive issues and women empowerment. - Disaster nursing. - Geriatric considerations in nursing. - Evidence based nursing practice- Best practices - Trans-cultural nursing.
XI	25	<p>Computer applications for patient care delivery system and nursing practice</p> <ul style="list-style-type: none"> - Use of computers in teaching, learning, research and nursing practice. - Windows, MS office: Word, Excel, Power Point, - Internet, literature search, - Statistical packages, - Hospital management information system: software's.

Practical

Clinical posting in the following areas:

- Specialty area- in-patient unit - 3 weeks
- Community health center/PHC - 2 weeks
- Emergency/ICU - 2 weeks

Activities

- Prepare Case studies with nursing process approach and theoretical basis
- Presentation of comparative picture of theories
- Family case- work using model of prevention
- Annotated bibliography
- Report of field visits (5)

Methods of Teaching

- Lecture cum discussion
- Seminar
- Panel discussion
- Debate
- Case Presentations
- Exposure to scientific conferences
- Field visits

Methods of evaluation :

- Tests
- Presentation
- Seminar
- Written assignments

Advance nursing Procedures

Definition, Indication and nursing implications;

- CPR, TPN, Hemodynamic monitoring, Endotracheal intubation, Tracheotomy, mechanical ventilation, Pacemaker, Hemodialysis, Peritoneal dialysis, LP, BT Pleural and abdominal paracentesis OT techniques, Health assessment, Triage, Pulseoxymetry.

Internal Assessment

<u>Techniques</u>	<u>Weight age</u>
<i>Test- (2 tests)</i>	<i>30</i>
<i>Assignment /Seminar/presentation</i>	<i>20</i>

	<i>50</i>

CLINICAL SPECIALITY – I
MEDICAL SURGICAL NURSING

Placement: 1st Year

Hours of instruction
Theory: 150 Hours
Practical: 750 Hours
Total: 900 Hours

Course Description

This course is common for the students undergoing clinical speciality-II in neurosciences nursing/cardiovascular & thoracic nursing/critical care nursing/oncology nursing/orthopedic and rehabilitation nursing/nephro & urology nursing, gastroenterology nursing/ geriatric nursing.

It is designed to assist students in developing expertise and in depth knowledge in the field of medical Surgical Nursing. It will help students to appreciate the patient as a holistic individual and develop skill to function as a specialized Medical-Surgical Nurse. It will further enable the student to function as educator, manager and researcher in the field of Medical – Surgical Nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends & issues in the field of Medical – Surgical Nursing as a speciality.
2. Apply concepts & theories related to health promotion.
3. Appreciate the client as a holistic individual.
4. Perform physical, psychosocial assessment of Medical – Surgical patients.
5. Apply Nursing process in providing care to patients.
6. Integrate the concept of family centered nursing care with associated disorder such as genetic, congenital and long-term illness.
7. Recognize and manage emergencies with Medical- Surgical patients.
8. Describe various recent technologies & treatment modalities in the management of critically ill patients.
9. Appreciate the legal & ethical issues relevant to Medical – Surgical Nursing.
10. Prepare a design for layout and management of Medical – Surgical Units.
11. Appreciate the role of alternative systems of Medicine in care of patients.
12. Incorporate evidence based Nursing practice and identify the areas of research in the field of Medical – Surgical Nursing.
13. Recognize the role of Nurse practitioner as a member of the Medical – Surgical health team.
14. Teach Medical – Surgical nursing to undergraduate nursing students & in-service nurses.

COURSE CONTENT:

Unit	Hours	Content
I	5	Introduction: <ul style="list-style-type: none">- Historical development of Medical- Surgical Nursing in India.- Current status of health and disease burden in India.- Current concept of health.- Trends & issues in Medical – Surgical Nursing.- Ethical & cultural issues in Medical – Surgical Nursing.- Rights of patients.- National health policy, special laws & ordinances relating to older people- National goals.- Five year plans.- National health programs related to adult health.

Unit	Hours	Content
II	20	Health Assessment of patients <ul style="list-style-type: none"> - History taking. - Physical examination of various systems. - Nutritional assessment. - Related investigations and diagnostic assessment.
III	5	Care in hospital settings: <ul style="list-style-type: none"> - Ambulatory care. - Acute and Critical care. - Long term care. - Home Health Care. - Characteristics, care models, practice settings, interdisciplinary team. - Hospitalization- effects of hospitalization on the patient & family. - Stressors & reactions related to disease process. - Nursing care using Nursing process approach.
IV	10	Management of patients with disorders of Gastrointestinal tract <ul style="list-style-type: none"> - Review of anatomy and physiology. -Common Disorders-etiology, Patho physiology,Clinical manifestations, complications, prognosis. -Health assessment- History taking, physical examination, investigation and diagnostic assessment. - Treatment modalities and trends. - Nursing management. - Related research studies. - Evidence based nursing practice. - Rehabilitation and follow-up.

CLINICAL SPECIALTY –I

CHILDHEALTH (PAEDIATRIC) NURSING

Placement : 1st Year

Hours of Instruction
Theory : 150 Hours
Practical : 750 Hours
Total : 900 Hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Pediatric Nursing. It will help students to appreciate the child as a holistic individual and develop skill to function as neonatal and pediatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Pediatric nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the history and developments in the field of pediatrics and pediatric nursing as a specialty
2. Apply the concepts of growth and development in providing care to the pediatric clients and their families.
3. Appreciate the child as a holistic individual
4. Perform physical, developmental, and nutritional assessment of pediatric clients
5. Apply nursing process in providing nursing care to neonates & children
6. Integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
7. Recognize and manage emergencies in neonates
8. Describe various recent technologies and treatment modalities in the management of high risk neonates
9. Appreciate the legal and ethical issues pertaining to pediatric and neonatal nursing
10. Prepare a design for layout and management of neonatal units
11. Incorporate evidence based nursing practice and identify the areas of research in the field of pediatric/neonatal nursing
12. Recognize the role of pediatric nurse practitioner and as a member of the pediatric and neonatal health team
13. Teach pediatric nursing to undergraduate students & in-service nurses

Course Content

Unit	Hours	Content
I	10	Introduction Historical development of Pediatrics and Pediatric Nursing in India; Current status of child health in India; Trends in Pediatrics and Pediatric Nursing, Ethical and cultural issues in pediatric care Rights of children National health policy for children, special laws and ordinances relating to children. National goals, Five year plans, National health programs related to child health.
II	10	Assessment of pediatric clients History taking Developmental assessment Physical assessment Nutritional assessment Family assessment
III	10	Hospitalized child Meaning of hospitalization of the child, preparation for hospitalization, effects of hospitalization on the child and family Stressors and reactions related to developmental stages, play activities for ill hospitalized child. Nursing care of hospitalized child and family -principles and practices
IV	15	Pre-natal Pediatrics Embryological and fetal development, Prenatal factors influencing growth and development of fetus. Genetic patterns of common pediatric disorders, chromosomal aberrations, genetic assessment and counseling legal and ethical aspects of genetic, screening and counseling role of nurse in genetic counseling, Importance of prenatal care and role of pediatric nurse.
V	15	Growth and Development of children Principles of growth and development, Concepts and theories of growth and development, Developmental tasks and special needs from infancy to adolescence, developmental milestones, Assessment of growth and development of pediatric clients, Factors affecting growth and development.

Unit	Hours	Content
VI	15	<p>Behavioral Pediatrics and Pediatric Nursing Parent child relationship, Basic behavioral pediatric principles and specific behavioral pediatric concepts/disorders- maternal deprivation, failure to thrive, child abuse, the battered child, Common behavioral problems and their management, Child guidance clinic.</p>
VII	15	<p>Preventive Pediatrics and Pediatric Nursing Concept, aims and scope of preventive pediatrics, Maternal health and its influence on child health antenatal aspects of preventive pediatrics, Immunization, expanded program on immunization/ universal immunization program and cold chain, Nutrition and nutritional requirements of children, changing patterns of feeding, baby- friendly hospital initiative and exclusive breast feeding, Health education, nutritional education for children Nutritional programs National and international organizations related to child health, Role of pediatric nurse in the hospital and community.</p>
VIII	30	<p>Neonatal Nursing New born baby- profile and characteristics of the new born, Assessment of the new born, Nursing care of the new born at birth, care of the new born and family, High risk newborn- pre term and term neonate and growth retarded babies, Identification and classification of neonates with infections, HIV & AIDS, Ophthalmia neonatorum, congenital syphilis. High risk new born- Identification, classification and nursing management Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU.</p>
IX	30	<p>IMNCI (Integrated management of neonatal and childhood illnesses)</p>

Practical

CLINICAL SPECIALITY-I

OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement: 1st year

Hours of Instruction
Theory: 150 Hours.
Practical: 750 Hours.
Total: 900 Hours.

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Obstetric and Gynaecological Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as educator, manager, and researcher in the field of Obstetric and Gynaecological nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends in the field of midwifery, obstetrics and gynecology as a speciality.
2. Describe the population dynamics and indicators of maternal and child health
3. Describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium.
4. Provide comprehensive nursing care to women during reproductive period and newborns.
5. Integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynaecological nursing.
6. Identify and analyze the deviations from normal birth process and refer appropriately.
7. Describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role of nurse
8. Counsel adolescents, women and families on issues pertaining to pregnancy, child birth and lactation
9. Describe the role of various types of complementary and alternative therapies in obstetric and gynaecological nursing.
10. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing.
11. Describe the recent advancement in contraceptive technology and birth control measures
12. Appreciate the legal and ethical issues pertaining to obstetric and gynaecological nursing.

Course Content

Units	Hours	Content
I	10	<p>Introduction</p> <ul style="list-style-type: none"> • Historical and contemporary perspectives • Epidemiological aspects of maternal and child health • Magnitude of maternal and child health problems • Issues of maternal and child health : Age, Gender, Sexuality, psycho Socio cultural factors • Preventive obstetrics. • National health and family welfare programmes related to maternal and child health: health care delivery system- National Rural health mission, Role of NGO's • Theories, models and approaches applied to midwifery practice • Role and scope of midwifery practice: Independent Nurse midwifery practitioner • Legal and Ethical issues: Code of ethics and standards of midwifery practice, standing orders • Evidence based midwifery practice • Research priorities in obstetric and gynaecological nursing.
II	15	<p>Human reproduction</p> <ul style="list-style-type: none"> • Review of anatomy and physiology of human reproductive system: male and female • Hormonal cycles • Embryology • Genetics, teratology and counseling • Clinical implications

Units	Hours	Content
III	25	<p>Pregnancy</p> <ul style="list-style-type: none"> ➤ Maternal adaptation : Physiological, psychosocial <ul style="list-style-type: none"> • Assessment–Maternal and foetal measures Maternal measures:History taking, examination-General, physical and obstetrical measure, identification of high risk, • Foetal measure- clinical parameters, biochemical- human estriol, Maternal Serum Alfa Feto Protein, Acetyl Choline esterase (AchE),Triple Test Amniocentesis, Amniocentesis, chorionic villus sampling (CVS)). • Biophysical-(US IMAGING, Foetal movement count, Ultra Sonography, Cardiotocography, electrocardiography, Non Stress Test(NST), Contraction stress test(CST), amnioscopy, foetoscopy, • Radiological examination, <ul style="list-style-type: none"> ○ Interpretation of diagnostic tests and nursing implications ○ Nursing management of the pregnant women, minor disorders of pregnancy and management, preparation for child birth and parenthood, importance of institutional delivery , choice of birth setting, importance and mobilizing of transportation, prenatal counseling, role of nurse and crisis intervention, identification of high risk pregnancy and refer ○ Alternative/complementary therapies
IV	25	<p>Normal Labour and nursing management:</p> <ul style="list-style-type: none"> • Essential factors of labour • Stages and onset <p>First stage: Physiology of normal labour</p> <ul style="list-style-type: none"> • Use of partograph: Principles, use and critical analysis, evidence based studies •Analgesia and anaesthesia in labour •Nursing management <p>Second stage</p> <ul style="list-style-type: none"> •Physiology , intrapartum monitoring •Nursing management. • Resuscitation , immediate newborn care and initiate breast feeding (Guidelines of National neonatology forum of India) <p>Third stage</p> <ul style="list-style-type: none"> •Physiology and nursing management <p>Fourth stage – Observation, critical analysis and Nursing management.</p> <ul style="list-style-type: none"> •Various child birth practice: water birth, position change etc •Evidence based practice in relation to labour intervention <p>Role of nurse midwifery practitioner</p> <ul style="list-style-type: none"> •Alternative/complementary therapies

Units	Hours	Content
V	20	<p>Normal puerperium and nursing management</p> <p>Physiology of puerperium Physiology of lactation, lactation management, exclusive breast feeding ,Baby friendly hospital initiative(BFHI) Assessment of postnatal women . Minor discomforts and complications of puerperium% Management of mothers during puerperium: Postnatal exercises Rooming in, bonding, warm chain Evidence based studies</p> <p>Role of nurse midwifery practitioner</p> <ul style="list-style-type: none"> •Alternative/complementary therapies
VI	20	<p>Normal Newborn</p> <p>Physiology and characteristics of normal newborn Physical and Behavioural assessment of newborn Needs of newborn Essential newborn care: Exclusive breast feeding, Immunization, Hygiene measures, Newborn nutrition Organization of neonatal care, services(Levels), transport, neonatal intensive care unit, organization and management of nursing services in NICU Observation and care of newborn Parenting process</p>
VII	10	<p>Pharmaco dynamics in obstetrics</p> <p>Drugs used in pregnancy, labour, post partum and newborn Calculation of drug dose and administration Effects of drugs used Anesthesia and analgesia in obstetrics Roles and responsibilities of midwifery nurse practitioner Standing orders and protocols and use of selected life saving drugs and interventions of obstetric emergencies approved by the MOHFW</p>
VIII	10	<p>Family welfare services</p> <p>Population dynamics Demography trends: vital statistics, calculation of indicators especially maternal and neonatal mortality rates and problems and other health problems Recent advancement in contraceptive technology Role of nurses in family welfare programmes in all settings Role of independent nurse midwifery practitioner Family life education Evidence based studies Information, Education and Communication(IEC) Management information and evaluation system(MIES) Teaching and supervision of health team members</p>

Units	Hours	Content
IX	5	<p>Infertility</p> <ul style="list-style-type: none"> Primary and secondary causes Diagnostic procedures Counseling: ethical and legal aspects of assisted reproductive technology(ART) Recent advancement in infertility management. Adoption procedures Role of nurses in infertility management.
X	5	<p>Menopause</p> <ul style="list-style-type: none"> Physiological, psychological and social aspects Hormone Replacement Therapy Surgical menopause Counseling and guidance Role of midwifery nurse practitioner
XI	5	<p>Abortion</p> <ul style="list-style-type: none"> Types, causes Legislations, Clinical rights and professional responsibility Abortion procedures Complications Nursing management <p>Role of midwifery nurse practitioner</p>

Practical

Total = 750 Hours
1 week = 30 Hours

S.No.	Dept./Unit	No. of Week	Total Hours
1	Antenatal Wards & OPDs	5	150
2	Labour Room	6	180
3	Postnatal Ward	2	60
4	Family Planning Clinics/Ward	2	60
5	PHC/Rural maternity settings	4	120
6	Gynaec OP/Ward	3	90
7	Maternity OT	2	60
8	NICU	1	30
	Total	25 Weeks	750Hours

Procedures observed

- Diagnostic investigations : amniocentesis, chordocentecis, chorionic villi sampling
- Infertility management: artificial reproduction : artificial insemination, in vitro fertilization, and related procedures

Procedures assisted

- Medical termination of pregnancy,

Procedures performed

- Antenatal assessment-20
- Postnatal assessment-20
- Assessment during labour : use of partograph - 20
- Per vaginal examination-20
- Conduct of normal delivery-20
- Episiotomy and suturing-10
- Setting up of delivery areas
- Insertion of intra uterine devices(copper T) 5

Others

- Identification of high risk women and referral
- Health education: to women and their families
- Motivation of couples for planned parenthood

Weightage for Internal Assessment:

CLINICAL SPECIALITY- I
COMMUNITY HEALTH NURSING

Placement : 1st Year

Hours of Instructions
Theory :150 hours
Practical :750 hours
Total : 900 hours

Course Description

The course is designed to assist students in developing expertise and in-depth understanding in the field of Community Health Nursing. It would help students to appreciate holistic life style of individuals, families & groups and develop skills to function as Community Health Nurse specialist/practitioner. It would further enable student to function as an educator, manager and researcher in the field of Community Health nursing.

Objectives

At the end of the course, the student will be able to:

1. Appreciate the history and development in the field of Community Health and Community Health Nursing.
2. Appreciate role of individuals and families in promoting health of the Community.
3. Perform physical, developmental and nutritional assessment of individuals, families and groups.
4. Apply the concepts of promotive, preventive, curative and rehabilitative aspects of health while providing care to the people.
5. Apply nursing process approach while providing care to individuals, families, groups and community.
6. Integrate the concepts of family centered nursing approach while providing care to the community.
7. Recognize and participate in the management of emergencies, epidemics and disasters.
8. Apply recent technologies and care modalities while delivering community health nursing care.
9. Appreciate legal and ethical issues pertaining to community health nursing care.
10. Conduct community health nursing care projects.
11. Participate in planning, implementation and evaluation of various national health and family welfare programmes at local, state and the national level.
12. Incorporate evidence based nursing practice and identify the areas of research in the community settings.

13. Participate effectively as a member of Community Health team.
14. Coordinate and collaborate with various agencies operating in the community by using inter-sectoral approach.
15. Teach community health nursing to undergraduates, in-service nurses and the community health workers.
16. Demonstrate leadership and managerial abilities in community health nursing practice

Course Content

Unit	Hours	Content

		<ul style="list-style-type: none"> ‰ Health agencies: NGO's, Roles and functions ‰ Inter-sectoral coordination ‰ Public private partnership ‰ Challenges of health care delivery system

Practical

Total = 750 Hours
1 Week = 30 Hours

S.No.	Dept./Unit	No. of Week	Total Hours
1	Sub-centre, PHC, CHC	14	420 Hours
2	District family welfare bureau	1	30 Hours
3	Urban centers	7	210 Hours
4	Field visits	3	90 Hours
	Total	25 Weeks	750 Hours

Student Activities

- Identification of community leaders and resource persons (community mapping)
- Community health survey
- Community health nursing process- individual, family and special groups and community
- Counseling
- Health education – campaign, exhibition, folk media, preparation of IEC materials
- Organizing and participating in special clinics/camps and national health and welfare programmes-Organize at least one health and family welfare mela/fair (all stalls of national health and family welfare activities should be included)
- Estimation of Vital health statistics -Exercise
- Drill for disaster preparedness
- Organize at least one in-service education to ANM's/LHV/PHN/HW
- Nutrition – Exercise on nutritional assessment on dietary planning, demonstration and education for various age groups
 - Filling up of Records, reports and registers maintained at SC/PHC/CHC
 - Assist women in self breast examination
 - Conduct antenatal examination
 - Conduct vaginal examination
 - Conduct deliveries
 - Post natal visits
 - Perform Episiotomy and suturing
 - Prepare Pap smear
 - Conduct Insertion/Removal of IUD
 - Blood Slide preparation
 - Field visits
 - Maintenance of log book for various activities

CLINICAL SPECIALITY – I

MENTAL HEALTH (PSYCHIATRIC) NURSING

Placement: 1st Year

Hours of Instruction

Theory: 150 hours

Practical 750 hours

Total: 900 hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Psychiatric Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function psychiatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate the trends and issues in the field of psychiatry and psychiatric nursing.
2. Explain the dynamics of personality development and human behavior.
3. Describe the concepts of psychobiology in mental disorders and its implications for psychiatric nursing
4. Demonstrate therapeutic communications skills in all interactions
5. Demonstrate the role of psychiatric nurse practitioner in various therapeutic modalities
6. Establish and maintain therapeutic relationship with individual and groups
7. Uses assertive techniques in personal and professional actions
8. Promotes self-esteem of clients, others and self
9. Apply the nursing process approach in caring for patients with mental disorders
10. Describe the psychopharmacological agents, their effects and nurses role
11. Recognize the role of psychiatric nurse practitioner and as a member of the psychiatric and mental health team
12. Describe various types of alternative system of medicines used in psychiatric settings
13. Incorporate evidence based nursing practice and identifies the areas of research in the field of psychiatric nursing

NURSING RESEARCH AND STATISTICS

Placement: 1st Year

Hours of Instruction
Theory: 150 Hours
Practical: 150 Hours
Total : 300 Hours

Part-A : Nursing Research

Theory 100 Hours
Practical 100Hours
Total : 200 Hours

Course Description:

The course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

General Objectives:

At the end of the course, the students will be able to:

1. Define basic research terms and concepts.
2. Review literature utilizing various sources
3. Describe research methodology
4. Develop a research proposal.
5. Conduct a research study.
6. Communicate research findings
7. Utilize research findings
8. Critically evaluate nursing research studies.
9. Write scientific paper for publication.

Unit	Hours		Course Content
	Theory	Practical	
VI	6		Sampling Population and sample Factors influencing sampling Sampling techniques Sample size Probability and sampling error Problems of sampling
VII	20	20	Tools and methods of Data collection: Concepts of data collection Data sources, methods/techniques quantitative Tools for data collection – types, characteristics and their development Validity and reliability of tools Procedure for data collection
VIII	5		Implementing research plan Pilot Study, review research plan (design)., planning for data collection, administration of tool/interventions, collection of data
IX	10	20	Analysis and interpretation of data Plan for data analysis: quantitative and qualitative Preparing data for computer analysis and presentation. Statistical analysis Interpretation of data Conclusion and generalizations Summary and discussion
X	10		Reporting and utilizing research findings: Communication of research results; oral and written Writing research report purposes, methods and style- vancouver, American Psychological Association(APA), Campbell etc Writing scientific articles for publication: purposes & style
XI	3	13	Critical analysis of research reports and articles
XII	4	12	Developing and presenting a research proposal

Activities:

- Annotated Bibliography of research reports and articles.
- Review of literature of selected topic and reporting
- Formulation of problem statement, objective and hypothesis
- Developing theoretical/conceptual framework.
- Preparation of a sample research tool

- Analysis and interpretation of given data
- Developing and presenting research proposal
- Journal club presentation
- Critical evaluation of selected research studies
- Writing a scientific paper.

Method of Teaching

- Lecture-cum-discussion
- Seminar/Presentations
- Project
- Class room exercises
- Journal club

Methods of Evaluation

- Quiz, Tests (Term)
- Assignments/Term paper
- Presentations
- Project work

Internal Assessment

	<i>Weightage (25 marks)</i>
<i>Term Test(2 tests)</i>	<i>10</i>

<i>project</i>	<i>5</i>
<i>Total</i>	<i>25</i>

Part –B : Statistics

Hours of Instruction
Theory : 50 Hours
Practical : 50 Hours
Total : 100 Hours

Course Description

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing.

General Objectives

At the end of the course the students will be able to:

1. Explain the basic concepts related to statistics
2. Describe the scope of statistics in health and nursing
3. Organize, tabulate and present data meaningfully.
4. Use descriptive and inferential statistics to predict results.
5. Draw conclusions of the study and predict statistical significance of the results.
6. Describe vital health statistics and their use in health related research.
7. Use statistical packages for data analysis

Unit	Hours		Course Content
	Theory	Practical	
I	7	4	Introduction: Concepts, types, significance and scope of statistics, meaning data, sample, parameter type and levels of data and their measurement Organization and presentation of data – Tabulation of data; Frequency distribution Graphical and tabular presentations.
II	4	4	Measures of central tendency: Mean, Median, Mode
III	4	5	Measures of variability; Range, Percentiles, average deviation, quartile deviation, standard deviation
IV	3	2	Normal Distribution: Probability, characteristics and application of normal probability curve; sampling error.
V	6	8	Measures of relationship: Correlation – need and meaning Rank order correlation; Scatter diagram method Product moment correlation Simple linear regression analysis and prediction.
VI	5	2	Designs and meaning: Experimental designs Comparison in pairs, randomized block design, Latin squares.
VII	8	10	Significance of Statistic and Significance between two Statistics (Testing hypothesis) Non parametric test – Chi-square test, Sign, median test, Mann Whitney test. Parametric test – ‘t’ test, ANOVA, MANOVA,ANCOVA
VIII	5	5	Use of statistical methods in psychology and education: Scaling – Z Score, Z Scaling Standard Score and T Score Reliability of test Scores: test-retest method, parallel forms, split half method.

Unit	Hours		Course Content
	Theory	Practical	
IX	4	2	Application of statistics in health: Ratios, Rates, Trends Vital health statistics – Birth and death rates. Measures related to fertility, morbidity and mortality
X	4	8	Use of Computers for data analysis Use of statistical package.

Activities

- Exercises on organization and tabulation of data,
- Graphical and tabular presentation of data
- Calculation of descriptive and inferential statistics(chi square, t-test, correlation)
- Practice in using statistical package
- Computing vital health statistics

Methods of Teaching:

- *Lecture-cum-discussion
- *Demonstration–on data organization, tabulation, calculation of statistics, use of statistical package, Classroom exercises, organization and tabulation of data,
- *Computing Descriptive and inferential statistics; vital and health statistics and use of computer for data entry and analysis using statistical package.

Methods of Evaluation

- Test, Classroom statistical exercises.

Internal Assessment

Weight age 25 marks

Test – (2 tests)

25

NURSING MANAGEMENT

Placement : II Year

Hours of Instruction
Theory : 150 Hours
Practical: 150 Hours
Total : 300 Hours

Course Description

This course is designed to assist students to develop a broad understanding of Principles, concepts, trends and issues related to nursing management. Further, it would provide opportunity to students to understand, appreciate and acquire skills in planning, supervision and management of nursing services at different levels to provide quality nursing services.

Objectives

At the end of the course, students will be able to:

1. Describe the philosophy and objectives of the health care institutions at various levels.
1. Identify trends and issues in nursing
3. Discuss the public administration, health care administration vis a vis nursing administration
4. Describe the principles of administration applied to nursing
5. Explain the organization of health and nursing services at the various levels/institutions.
6. Collaborate and co-ordinate with various agencies by using multi- sectoral approach
7. Discuss the planning, supervision and management of nursing workforce for various health care settings.
8. Discuss various collaborative models between nursing education and nursing service to improve the quality of nursing care
9. Identify and analyze legal and ethical issues in nursing administration
10. Describe the process of quality assurance in nursing services.
11. Demonstrate leadership in nursing at various levels

Course Content

Unit	Hours	Content
I	10	<p>Introduction</p> <p>Philosophy, purpose, elements, principles and scope of administration</p> <p>Indian Constitution, Indian Administrative system vis a vis health care delivery system: National, State and Local</p> <p>Organization and functions of nursing services and education at National, State, District and institutions: Hospital and Community</p> <p>Planning process: Five year plans, Various Committee Reports on health, State and National Health policies, national population policy, national policy on AYUSH and plans,</p>
II	10	<p>Management</p> <p>Functions of administration</p> <p>Planning and control</p> <p>Co-ordination and delegation</p> <p>Decision making – decentralization basic goals of decentralization.</p> <p>Concept of management</p> <p>Nursing management</p> <p>Concept, types, principles and techniques</p> <p>Vision and Mission Statements</p> <p>Philosophy, aims and objective</p> <p>Current trends and issues in Nursing Administration</p> <p>Theories and models</p> <p>Application to nursing service and education</p>
III	15	<p>Planning</p> <p>Planning process: Concept, Principles, Institutional policies</p> <p>Mission, philosophy, objectives,</p> <p>Strategic planning</p> <p>Operational plans</p> <p>Management plans</p> <p>Programme evaluation and review technique(PERT), Gantt chart, Management by objectives(MBO)</p> <p>Planning new venture</p> <p>Planning for change</p> <p>Innovations in nursing</p> <p>Application to nursing service and education</p>
IV	15	<p>Organization</p> <p>Concept, principles, objectives, Types and theories, Minimum requirements for organization, Developing an organizational Structure, levels, organizational Effectiveness and organizational Climate,</p> <p>Organising nursing services and patient care: Methods of patient assignment- Advantages and disadvantages, primary nursing care,</p> <p>Planning and Organising: hospital, unit and ancillary services(specifically central sterile supply department, laundry, kitchen, laboratory services, emergency etc)</p>

Unit	Hours	Content
		<p>% Disaster management: plan, resources, drill, etc</p> <p>Application to nursing service and education</p>
V	15	<p>Human Resource for health</p> <p>Staffing</p> <ul style="list-style-type: none"> • Philosophy • Norms: Staff inspection unit(SIU), Baja Committee, High power committee, Indian nursing council (INC) • Estimation of nursing staff requirement- activity analysis • Various research studies <p>Recruitment: credentialing, selection, placement, promotion</p> <p>Retention</p> <p>Personnel policies</p> <p>Termination</p> <p>Staff development programme</p> <p>Duties and responsibilities of various category of nursing personnel</p> <p>Applications to nursing service and education</p>
VI	15	<p>Directing</p> <p>Roles and functions</p> <p>Motivation: Intrinsic, extrinsic, Creating motivating climate, Motivational theories</p> <p>Communication : process, types, strategies, Interpersonal communication, channels, barriers, problems, Confidentiality, Public relations</p> <p>Delegation; common delegation errors</p> <p>Managing conflict: process, management, negotiation, consensus</p> <p>Collective bargaining: health care labour laws, unions, professional associations, role of nurse manager</p> <p>Occupational health and safety</p> <p>Application to nursing service and education</p>
VII	10	<p>Material management</p> <p>Concepts, principles and procedures</p> <p>Planning and procurement procedures : Specifications</p> <p>ABC analysis,</p> <p>VED (very important and essential daily use) analysis</p> <p>Planning equipments and supplies for nursing care: unit and hospital</p> <p>Inventory control</p> <p>Condemnation</p> <p>Application to nursing service and education</p>

Unit	Hours	Content
VIII	15	<p>Controlling</p> <p>Quality assurance – Continuous Quality Improvement</p> <ul style="list-style-type: none"> •Standards •Models •Nursing audit
		<p>Performance appraisal: Tools, confidential reports, formats, Management, interviews</p> <p>Supervision and management: concepts and principles</p> <p>Discipline: service rules, self discipline, constructive versus destructive discipline, problem employees, disciplinary proceedings- enquiry etc</p> <p>Self evaluation or peer evaluation, patient satisfaction, utilization review</p> <p>Application to nursing service and education</p>
IX	15	<p>Fiscal planning</p> <p>Steps</p> <p>Plan and non-plan, zero budgeting, mid-term appraisal, capital and revenue</p> <p>Budget estimate, revised estimate, performance budget</p> <p>Audit</p> <p>Cost effectiveness</p> <p>Cost accounting</p> <p>Critical pathways</p> <p>Health care reforms</p> <p>Health economics</p> <p>Health insurance</p> <p>Budgeting for various units and levels</p> <p>Application to nursing service and education</p>
X	10	<p>Nursing informatics</p> <p>Trends</p> <p>General purpose</p> <p>Use of computers in hospital and community</p> <p>Patient record system</p> <p>Nursing records and reports</p> <p>Management information and evaluation system (MIES)</p> <p>E- nursing, Telemedicine, telenursing</p> <p>Electronic medical records</p>

Unit	Hours	Content
XI	10	<p>Leadership</p> <p>Concepts, Types, Theories Styles Manager behaviour Leader behaviour Effective leader: Characteristics, skills Group dynamics Power and politics lobbying Critical thinking and decision making Stress management</p> <p>Applications to nursing service and education</p>
XII	10	<p>Legal and ethical issues</p> <p>Laws and ethics Ethical committee Code of ethics and professional conduct Legal system: Types of law, tort law, and liabilities Legal issues in nursing: negligence, malpractice, invasion of privacy, defamation of character Patient care issues, management issues, employment issues Medico legal issues Nursing regulatory mechanisms: licensure, renewal, accreditation Patients rights, Consumer protection act(CPA) Rights of special groups: children, women, HIV, handicap, aging Professional responsibility and accountability Infection control Standard safety measures</p>

PRACTICALS

- Prepare prototype personal files for staff nurses, faculty and cumulative records
- Preparation of budget estimate, revised estimate and performance budget
- Plan and conduct staff development programme
- Preparation of Organization Chart
- Developing nursing standards/protocols for various units
- Design a layout plan for speciality units /hospital, community and educational institutions
- Preparation of job description of various categories of nursing personnel
- Prepare a list of equipments and supplies for speciality units
- Assess and prepare staffing requirement for hospitals, community and educational institutions
- Plan of action for recruitment process

- Prepare a vision and mission statement for hospital, community and educational institutions
- Prepare a plan of action for performance appraisal
- Identify the problems of the speciality units and develop plan of action by using problem solving approach
- Plan a duty roster for speciality units/hospital, community and educational institutions
- Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurses notes, Official letters, curriculum vitae, presentations Etc.,
- Prepare a plan for disaster management
- Group work
- Field appraisal report

Weightage for Internal Assessment

CLINICAL SPECIALITY – II MEDICAL SURGICAL NURSING

SUB SPECIALITY – CARDIO VASCULAR AND THORACIC NURSING

Placement : II year

Hours of Instruction

Theory : 150 hours

Practical :1050 hours

Total : 1200 hours.

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of cardiovascular and thoracic nursing. It will help students to develop advanced skills for nursing intervention in various cardio medical and surgical conditions. It will enable the student to function as Cardio vascular and Thoracic Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of cardio vascular and thoracic nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to cardio vascular and thoracic Nursing.
2. Describe the epidemiology, etiology, psychophysiology and diagnostic assessment of cardio vascular and thoracic conditions
3. Participate in national health programs for health promotion, prevention and rehabilitation of patients with cardio vascular and thoracic conditions
4. Perform physical, psychosocial & spiritual assessment
5. Assist in various diagnostic, therapeutic and surgical procedures
6. Apply nursing process in providing comprehensive care to patients with cardio vascular and thoracic conditions
7. Demonstrate advance skills/competence in managing patients with cardio vascular and thoracic conditions including Advance Cardiac Life Support.
8. Describe the various drugs used in cardio vascular and thoracic conditions and nurses responsibility
9. Demonstrate skill in handling various equipments/gadgets used for critical care of cardio vascular and thoracic patients
10. Appreciate team work & coordinate activities related to patient care.
11. Practice infection control measures.
12. Identify emergencies and complications & take appropriate measures
13. Discuss the legal and ethical issues in cardio vascular and thoracic nursing
14. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs.
15. Appreciate the role of alternative system of medicine in care of patient

16. Incorporate evidence based nursing practice and identify the areas of research in the field of cardio vascular and thoracic nursing
17. Identify the sources of stress and manage burnout syndrome among health care providers.
18. Teach and supervise nurses and allied health workers.
19. Design a layout of ICCU and ICTU and develop standards for cardio vascular and thoracic nursing practice.

Content Outline

Unit	Hours	Content
I	5	<p>Introduction</p> <p>Historical development, trends and issues in the field of cardiology. Cardio vascular and thoracic conditions – major health problem. Concepts, principles and nursing perspectives Ethical and legal issues Evidence based nursing and its application in cardio vascular and thoracic nursing(to be incorporated in all the units)</p>
II	5	<p>Epidemiology</p> <p>Risk factors: hereditary, psycho social factors, hypertension, smoking, obesity, diabetes mellitus etc Health promotion, disease prevention, Life style modification National health programs related to cardio vascular and thoracic conditions Alternate system of medicine Complementary therapies</p>
III	5	<p>Review of anatomy and physiology of cardio vascular and respiratory system</p> <p>Review of anatomy and physiology of heart, lung, thoracic cavity and blood vessels. Embryology of heart and lung. Coronary circulation Hemodynamics and electro physiology of heart. Bio-chemistry of blood in relation to cardio pulmonary function.</p>
IV	20	<p>Assessment and Diagnostic Measures:</p> <p>History taking Physical assessment</p> <ul style="list-style-type: none"> • Heart rate variability: Mechanisms , measurements, pattern, factors, impact of interventions on HRV <p>Diagnostic tests</p> <ul style="list-style-type: none"> • Hemodynamic monitoring: Technical aspects, monitoring, functional hemodynamic indices, ventricular

Unit	Hours	Content
		<p>output measurements (Arterial and swan Ganz monitoring). Blood gases and its significance, oxygen supply and demand</p> <ul style="list-style-type: none"> • Radiologic examination of the chest: interpretation, chest film findings • Electro cardiography(ECG) : electrical conduction through the heart, basic electrocardiography, 12 lead electrocardiogram, axis determination <ul style="list-style-type: none"> - ECG changes in: intra ventricular conduction abnormalities- Arrhythmias, ischemia, injury and infarction, atrial and ventricular enlargement, electrolyte imbalance, • Electrocardiography: technical aspects, special • Nuclear and other imaging studies of the heart: Magnetic Resonance Imaging. • Cardio electro physiology procedures: diagnostic studies, interventional and catheter ablation, nursing care • Exercise testing: indications and objectives, • Cardiac catheterization: indications, contraindications, patient preparation, procedure, interpretation of data • Pulmonary function test: Bronchoscopy and graphies • Interpretation of diagnostic measures • Nurse's role in diagnostic tests <p>Laboratory tests using blood: Blood specimen collection, Cardiac markers, Blood lipids, Hematologic studies, Blood cultures, Coagulation studies, Arterial blood gases, Blood Chemistries, cardiac enzyme studies, Serum Concentration of Selected drugs. Interpretation and role of nurse</p>

Unit	Hours	Content
V	25	<p>Cardiac disorders and nursing management: Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Hypertension • Coronary Artery Disease. • Angina of various types. • Cardiomegaly • Myocardial Infarction, Congestive cardiac failure • Heart Failure, Pulmonary Edema, Shock. • Rheumatic heart disease and other Valvular Diseases • Inflammatory Heart Diseases, Infective Endocarditis, Myocarditis, Pericarditis. • Cardiomyopathy, dilated, restrictive, hypertrophic. • Arrhythmias, heart block <p>Associated illnesses</p>
VI	10	<p>Altered pulmonary conditions Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Bronchitis • Bronchial asthma • Bronchiectasis • Pneumonias • Lung abscess, lung tumour • Pulmonary tuberculosis, fibrosis, pneumonias etc • Pleuritis, effusion • Pneumo, haemo and pyothorax • Interstitial Lung Disease • Cystic fibrosis • Acute and Chronic obstructive pulmonary disease (conditions leading to) • Cor pulmonale • Acute respiratory failure • Adult respiratory distress syndrome • Pulmonary embolism • Pulmonary Hypertension

Unit	Hours	Content
VII	10	<p>Vascular disorders and nursing management</p> <p>Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Disorders of arteries • Disorders of the aorta • Aortic Aneurysms, • Aortic dissection • Raynaud's phenomenon • Peripheral arterial disease of the lower extremities • Venous thrombosis • Varicose veins • Chronic venous insufficiency and venous leg ulcers • Pulmonary embolism
VIII	10	<p>Cardio thoracic emergency interventions</p> <p>CPR- BLS and ALS Use of ventilator, defibrillator , pacemaker Post resuscitation care. Care of the critically ill patients Psychosocial and spiritual aspects of care Stress management; ICU psychosis Role of nurse</p>
IX	10	<p>Nursing care of a patient with obstructive airway</p> <p>Assessment Use of artificial airway Endotracheal intubation, tracheostomy and its care Complication, minimum cuff leak, securing tubes Oxygen delivery systems. Nasal Cannula</p>
		<p>Oxygen mask, Venturi mask Partial rebreathing bag Bi-PAP and C-PAP masks Uses, advantages, disadvantages, nursing implications of each. Mechanical Ventilation Principles of mechanical ventilation Types of mechanical ventilation and ventilators. Modes of ventilation, advantage, disadvantage, complications. PEEP therapy, indications, physiology, and complications. Weaning off the ventilator. Nursing assessment and interventions of ventilated patient.</p>

Unit	Hours	Content
X	10	<p>Congenital Heart Diseases, Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of:</p> <ul style="list-style-type: none"> • Embryo logical development of heart. • Classification – cyanotic and acyanotic heart disease. • Tetralogy of Fallots. • Atrial Septal Defect, Ventricular Septal Defect., Eisenmenger’s complex. • Patent ductus arteriosus, AP window • Truncus Arteriosus. • Transposition of great arteries. • Total Anomaly of Pulmonary Venous Connection. • Pulmonary stenosis, atresia. • Coarctation of aorta. • Ebstein’s anomaly • Double outlet right ventricle, Single ventricle, Hypoplastic left heart syndrome.
XI	10	<p>Pharmacology Review Pharmacokinetics Analgesics/Anti inflammatory agents Antibiotics, antiseptics Drug reaction & toxicity Drugs used in cardiac emergencies Blood and blood components</p> <ul style="list-style-type: none"> • Antithrombolytic agents • Inotropic agents • Beta-blocking agents • Calcium channel blockers. • Vaso constrictors • Vaso dilators • ACE inhibitors. • Anticoagulants • Anti arrhythmic drugs. • Anti hypertensives • Diuretics • Sedatives and tranquilizers. • Digitalis.

Unit	Hours	Content
		<ul style="list-style-type: none"> • Antilipemics <p>Principles of drug administration, role and responsibilities of nurses and care of drugs</p>
XII	20	<p>Nursing Care of patient undergoing cardio thoracic surgery</p> <p>Indications, selection of patient</p> <p>Preoperative assessment and preparation; counseling.</p> <p>Intraoperative care: Principles of open heart surgery, equipment, anaesthesia, cardiopulmonary by pass.</p> <p>Surgical procedures for Coronary Artery Bypass Grafting, recent advances and types of grafts, Valve replacement or reconstruction, cardiac transplant, Palliative surgery and different Stents, vascular surgery, other recent advances.</p> <p>Thoracic surgery: lobectomy, pneumonectomy, tumour excision etc</p> <p>Immediate postoperative care : assessment, post operative problems and interventions : Bleeding, Cardiac tamponade, Low cardiac output, Infarction, Pericardial effusion, Pleural effusion, Pneumothorax, Haemothorax, Coagulopathy, Thermal imbalance, Inadequate., ventilation/perfusion, Neurological problems, renal problems, Psychological problems.</p> <p>Chest physiotherapy</p> <p>Nursing interventions- life style modification, complementary therapy/alternative systems of medicine.</p> <p>Intermediate and late post operative care after CABG, valve surgery, others.</p> <p>Follow up care</p>
XIII	5	<p>Cardiac rehabilitation</p> <p>Process</p> <p>Physical evaluation</p> <p>Life style modification</p> <p>Physical conditioning for cardiovascular efficiency through exercise</p> <p>Counseling</p> <p>Follow up care</p>
XIV	5	<p>Intensive Coronary Care Unit/intensive cardio thoracic unit:</p> <p>Quality assurance</p> <ul style="list-style-type: none"> •Standards, Protocols, Policies, Procedures •Infection control; Standard safety measures •Nursing audit •Design of ICCU/ICTU •Staffing; cardiac team •Burn out syndrome <p>Nurse's role in the management of I.C.C.U and ICTU.</p> <p>Mobile coronary care unit.</p> <p>Planning in service educational programme and teaching</p>

Practicals

Total – 1050 Hours
1 Weeks = 30 Hours

S.No.	Dept/ Unit	No. of Week	Total Hours
1	Cardio thoracic -Medical	4	120 Hours
	-Surgical	4	120 Hours
2.	OTs (Cardiac and thoracic)	5	150 Hours
3.	Casualty	2	60 Hours
4.	Diagnostic labs including cath lab	2	60 Hours
5.	ICCU	5	150 Hours
6.	ICU	4	120 Hours
7.	CCU	5	150 Hours
8.	Pediatric Intensive	2	60 Hours
9.	OPD	2	60 Hours
	Total	35 Weeks	1050 Hours

Essential Nursing Skills

Procedures Observed

1. Echo cardiogram
2. Ultrasound
3. Monitoring JVP , CVP
4. CT SCAN
5. MRI
6. Pet SCAN
7. Angiography
8. Cardiac catheterization
9. Angioplasty
10. Various Surgeries
11. Any other

I. Procedures Assisted

1. Arterial blood gas analysis
2. Thoracentesis
3. Lung biopsy
4. Computer assisted tomography (CAT Scan)
5. M.R.I.
6. Pulmonary angiography
7. Bronchoscopy
8. Pulmonary function test
9. ET tube insertion
10. Tracheostomy tube insertion
11. Cardiac catheterization
12. Angiogram

13. Defibrillation
14. Treadmill test
15. Echo cardiography
16. Doppler ultrasound
17. Cardiac surgery
18. Insertion of chest tube
19. CVP Monitoring
20. Measuring pulmonary artery pressure by Swan-Ganz Catheter
21. Cardiac Pacing

II. Procedures Performed

1. Preparation of assessment tool for CT client (Cardiac, thoracic and vascular).
2. ECG – Recording, Reading, Identification of abnormalities
3. Oxygen therapy – Cylinder, central supply,
Catheter, nasal canula, mask, tent Through ET and
Tracheostomy tube Manual resuscitation bag
4. Mechanical ventilation
5. Spirometer
6. Tuberculin skin test
7. Aerosol therapy
8. Nebulizer therapy
9. Water seal drainage
10. Chest physiotherapy including – Breathing Exercises
Coughing Exercises
Percussion & Vibration
11. Suctioning – Oropharyngeal, nasotracheal, Endotracheal
Through tracheostomy tube
12. Artificial airway cuff maintenance
13. CPR
14. Care of client on ventilator
15. Identification of different – Arrhythmias
Abnormal pulses, respirations
B.P. Variation
Heart sounds
Breath sounds
16. Pulse oxymetry
17. Introduction of intracath
18. Bolus I.V. Injection
19. Life line
20. Maintenance of “Heplock”
21. Subcutaneous of Heparin
22. Obtaining leg measurements to detect early swelling in
thrombophlebetes
23. Identification of Homans signs
24. Buerger – Allen exercises

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING - CRITICAL CARE NURSING

Placement: II Year

Hours of instruction
Theory: 150 hours
Practical: 1050 hrs Total
: 1200 hours

Course Description

This course is designed to assist students in developing expertise and in-depth knowledge in the field of Critical care Nursing. It will help students to develop advanced skills for nursing intervention in caring for critically ill patients. It will enable the student to function as critical care nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of Critical Care Nursing.

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to Critical Care Nursing.
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of critically ill patients
3. Describe the various drugs used in critical care and nurses responsibility
3. Perform physical, psychosocial & spiritual assessment
5. Demonstrate advance skills/competence in managing critically ill patients including Advance Cardiac Life Support.
6. Demonstrate skill in handling various equipments/gadgets used for critical care
7. Provide comprehensive care to critically ill patients.
8. Appreciate team work & coordinate activities related to patient care.
9. Practice infection control measures.
10. Assess and manage pain .
11. Identify complications & take appropriate measures.
12. Discuss the legal and ethical issues in critical care nursing
13. Assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
14. Assist in various diagnostic, therapeutic and surgical procedures
15. Incorporate evidence based nursing practice and identify the areas of research in the field of critical care nursing

16. Identify the sources of stress and manage burnout syndrome among health care providers.
17. Teach and supervise nurses and allied health workers.
18. Design a layout of ICU and develop standards for critical care nursing practice.

Course Content

Unit	Hours	Content
I	5	Introduction to Critical Care Nursing Historical review- Progressive patient care(PPC) Review of anatomy and physiology of vital organs, fluid and electrolyte balance Concepts of critical care nursing Principles of critical care nursing Scope of critical care nursing Critical care unit set up including equipments supplies, use and care of various type of monitors & ventilators Flow sheets
II	10	Concept of Holistic care applied to critical care nursing practice Impact of critical care environment on patients:- <ul style="list-style-type: none"> • Risk factors, Assessment of patients, Critical care psychosis, prevention & nursing care for patients affected with psycho physiological & psychosocial problems of critical care unit, Caring for the patient's family, family teaching The dynamics of healing in critical care unit:-therapeutic touch, Relaxation, Music therapy, Guided Imagery, acupressure Stress and burnout syndrome among health team members
III	14	Review Pharmacokinetics Analgesics/Anti inflammatory agents Antibiotics, antiseptics Drug reaction & toxicity Drugs used in critical care unit (inclusive of ionotropic, life saving drugs) Drugs used in various body systems IV fluids and electrolytes Blood and blood components Principles of drug administration, role of nurses and care of drugs
IV	5	Pain Management Pain & Sedation in Critically ill patients Theories of pain, Types of pain, Pain assessment, Systemic responses to pain pain management-pharmacological and non-pharmacological measures % Placebo effect

Unit	Hours	Content
V	5	Infection control in intensive care unit Nosocomial infection in intensive care unit; methyl resistant staphylococcus aureus (MRSA), Disinfection, Sterilization, Standard safety measures, Prophylaxis for staff
VI	10	Gastrointestinal System Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Gastrointestinal Bleeding, Abdominal injury, Hepatic Disorders:-Fulminant hepatic failure, Hepatic encephalopathy, Acute Pancreatitis, Acute intestinal obstruction, perforative peritonitis
VII	10	Renal System Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Acute Renal Failure, Chronic Renal Failure, Acute tubular necrosis, Bladder trauma Management Modalities: Hemodialysis, Peritoneal Dialysis, Continuous Ambulatory Peritoneal Dialysis, Continuous arterio venous hemodialysis, Renal Transplant,
VIII	10	Nervous System Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing management of:-Common Neurological Disorders:-Cerebrovascular disease, Cerebrovascular accident, Seizure disorders, GuilleinBarre-Syndrome, Myasthenia Gravis, Coma, Persistent vegetative state, Encephalopathy, Head injury, Spinal Cord injury Management Modalities: Assessment of Intracranial pressure, Management of intracranial hypertension, Craniotomy Problems associated with neurological disorders: Thermo regulation, Unconsciousness, Herniation syndrome
IX	5	Endocrine System Causes, Pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: Medical, Surgical and Nursing Management of :-Hypoglycemia, Diabetic Ketoacidosis, Thyroid crisis, Myxoedema, Adrenal crisis, Syndrome of Inappropriate/hyper secretion of Anti diuretic Hormone (SIADH)

Unit	Hours	Content
X	15	<p>Management of other Emergency Conditions</p> <p>Mechanism of injury, Thoracic injuries, Abdominal injuries, pelvic fractures, complications of trauma, Head injuries</p> <p>Shock: Shock syndrome, Hypovolemic, Cardiogenic, Anaphylactic, Neurogenic and Septic shock</p> <p>Systemic inflammatory Response: The inflammatory response, Multiple organ dysfunction syndrome</p> <p>D i s s e m i n a t e d Intravascular Coagulation</p> <p>Drug Overdose and Poisoning,</p> <p>Acquired Immunodeficiency Syndrome (AIDS)</p>
		<p>Ophthalmic: Eye injuries, Glaucoma, retinal detachment</p> <p>Ear Nose Throat: Foreign bodies, stridor, bleeding, quincy, acute allergic conditions</p> <p>Psychiatric emergencies;, suicide, crisis intervention</p>
XI	20	<p>Cardiovascular emergencies</p> <p>Principles of Nursing in caring for patient's with Cardiovascular disorders</p> <p>Assessment: Cardiovascular system: Heart sounds, Diagnostic studies:- Cardiac enzymes studies, Electrocardiographic monitoring, Holter monitoring, Stress test. Echo cardiography, Coronary angiography, Nuclear medicine studies</p> <p>Causes, Pathophysiology, Clinical types, Clinical features, Diagnostic Prognosis, Management : Medical, Surgical & Nursingmanagement of:-Hypertensive crisis, Coronary artery disease, Acute Myocardial infarction, Cardiomyopathy, Deep vein thrombosis, Valvular diseases, Heart block, Cardiac arrhythmias & conduction disturbances, Aneurysms, Endocarditis, Heart failure Cardio pulmonary resuscitation BCLS/ ACLS</p> <p>Management Modalities: Thrombolytic therapy, Pacemaker – Temporary & permanent, Percutaneous transluminal coronary angioplasty, Cardioversion, Intra Aortic Balloon pump monitoring, De fibrillations, Cardiac surgeries, Coronary Artery Bypass Grafts (CABG/MICAS), Valvular surgeries, Heart Transplantation, Autologous blood transfusion, Radio frequency Catheter Ablation</p>

Unit	Hours	Content
XII	15	<p>Respiratory System Acid-base balance & imbalance Assesment : History & Physical Examination Diagnostic Tests:Pulse Oximetry, End –Tidal Carbon Dioxide Monitoring, Arterial blood gas studies,chest radiography, pulmonary Angiography, Bronchoscopy, Pulmonary function Test, Ventilation perfusion scan, Lung ventilation scan Causes Pathophysiology, Clinical types, Clinical features, Prognosis, Management: Medical,Surgical and Nursing management of Common pulmonary disorders:-Pneumonia, Status asthmatics, interstitial drug disease, Pleural effusion, Chronic obstructive pulmonary disease, Pulmonary tuberculosis, Pulmonary edema, Atelectasis, Pulmonary embolism, Acute respiratory failure, Acute respiratory distress syndrome (ARDS), Chest Trauma Haemothorax, Pneumothorax Management Modalities:-Airway Management Ventilatory Management:- Invasive, non-invasive, long term mechanical ventilations Bronchial Hygiene:- Nebulization, deep breathing exercise, chest physiotherapy, postural drainage, Inter Costal Drainage, Thoracic surgeries</p>
XIII	7	<p>Burns Clinical types, classification, pathophysiology, clinical features, assessment, diagnosis, prognosis, Management: Medical, Surgical & Nursing management of burns Fluid and electrolyte therapy – calculation of fluids and its administration Pain management Wound care Infection control Prevention and management of burn complications Grafts and flaps Reconstructive surgery Rehabilitation</p>
XIV	5	<p>Obstetrical Emergencies Causes, Pathophysiology, Clinical types, clinical features, diagnostic Prognosis, Management: Medical, Surgical and Nursing management of :Antepartum haemorrhage, Preeclampsia, eclampsia, Obstructed labour and ruptured uterus, Post partum hemorrhage, Peurperal sepsis, Obstetrical shock</p>

Unit	Hours	Content
XV	10	<p>Neonatal Paediatric emergencies Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Neonatal emergencies <p>Asphyxia Neonatarum, Pathological Jaundice in Neonates, Neonatal seizures, Metabolic disorders, Intra cranial Hemorrhage, Neonatal Sepsis, RDS/HMD (Respiratory Distress Syndrome/Hyaline Membrane Disease), Congenital disorders:-</p> <ul style="list-style-type: none"> • Cyanotic heart disease, tracheo oesophageal fistula, congenital hypertrophic pyloric stenosis, imperforate anus • Pediatric emergencies <p>Dehydration, Acute broncho pneumonia, Acute respiratory distress syndrome, Poisoning, Foreign bodies, seizures, traumas, Status asthmaticus</p>
XVI	2	<p>Legal and ethical issues in critical care-Nurse's role Brain death Organ donation & Counselling Do Not Resuscitate(DNR) Euthanasia Living will</p>
XVII	2	<p>Quality assurance Standards, Protocols, Policies, Procedures Infection control; Standard safety measures Nursing audit Staffing Design of ICU/CCU</p>

Practical

Total = 1050 Hours

1 Week = 30 Hours

S.No.	Dept./Unit	No. of Week	Total Hours
3	Burns ICU	3	90 Hours
5	Medical ICU	9	270 Hours
6	Surgical ICU	12	360 Hours
9	CCU	2	60 Hours
10	Emergency Department	4	120 Hours
12	Dialysis Unit	1	30 Hours
13	Transplant Room	2	60 Hours
14	Paediatric/ NICU	2	60 Hours
	Total	35 Weeks	1050Hours

ESSENTIAL CRITICAL CARE NURSING SKILLS I.

Procedures Observed

1. CT Scan
2. MRI
3. EEG
4. Hemodialysis
5. Endoscopic Retrograde cholangio Pancreaticogram(ERCP)
6. Heart/ Neuro/GI./ Renal Surgeries

II. Procedures Assisted

1. Advanced life support system
2. Basic cardiac life support
3. Arterial line/arterial pressure monitoring/blood taking
4. Arterial blood gas
5. ECG recording
6. Blood transfusion
7. IV cannulation therapy
8. Arterial Catheterization
9. Chest tube insertion
10. Endotracheal intubations
11. Ventilation
12. Insertion of central line/cvp line
13. Connecting lines for dialysis

III. Procedure Performed

1. Airway management
 - a. Application of oropharyngeal airway
 - b. Oxygen therapy
 - c. CPAP (Continuous Positive Airway pressure)
 - d. Care of tracheostomy
 - e. Endotracheal extubation
2. Cardiopulmonary resuscitation, Basic cardiac life support, ECG
3. Monitoring of critically ill patients – clinically with monitors, capillary refill time (CRT) assessment of jaundice, ECG.
4. Gastric lavage
5. Assessment of critically ill patients
 - Identification & assessment of risk factors, Glasgow coma scale, and dolls eye movement, arterial pressure monitoring, cardiac output/pulmonary artery pressure monitoring, and detection of life threatening abnormalities
6. Admission & discharge of critically ill patients
7. Nutritional needs – gastrostomy feeds, pharyngeal feeds, jejunostomy feeds, TPN, formula preparation & patient education.
8. Assessment of patient for alteration in blood sugar levels monitoring blood sugar levels periodically & administering insulin periodically.
9. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, use of insulin syringes/ tuberculin, monitoring fluid therapy, blood administration.
10. Setting up dialysis machine and starting, monitoring and closing dialysis
11. Procedures for prevention of infections:
 - Hand washing, disinfection & sterilization surveillance,
12. Collection of specimen.
13. Setting, use & maintenance of basic equipment, ventilator, & syringe pumps, centrifuge machine.

Weightage for Internal Assessment: (common to all speciality)

CLINICAL SPECIALITY-II

MEDICAL SURGICAL NURSING- ONCOLOGY NURSING

Placement : II Year

Hours of Instruction

Theory : 150Hrs.

Practical : 950 hrs.

Total : 1100 hrs.

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of oncology Nursing. It will help students to develop advanced skills for nursing intervention in various oncological conditions. It will enable the student to function as oncology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of oncology nursing

Objectives

1. Explain the prevention, screening and early detection of cancer
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of oncological disorders of various body systems
3. Describe the psychosocial effects of cancer on patients and families.
4. Demonstrate skill in administering/assisting in various treatment modalities used for patients with cancer
5. Apply nursing process in providing holistic care to patients with cancer.
6. Apply specific concepts of pain management
7. Appreciate the care of death and dying patients and value of bereavement support.
8. Describe the philosophy, concept and various dimensions of palliative care
9. Appreciate the role of alternative systems of medicine in care of cancer patients
10. Appreciate the legal & ethical issues relevant to oncology nursing
11. Recognize and manage Oncological emergencies
12. Counsel the patients with cancer and their families
13. Incorporate evidence based nursing practice and identify the areas of research in the field of oncology nursing
14. Recognize the role of oncology nurse practitioner as a member of oncology team
15. Collaborate with other agencies and utilize resources in caring for cancer patients.
16. Teach and supervise nurses and allied health workers.
17. Design a layout and develop standards for management of oncology units/hospitals and nursing care.

Content outline

Unit	Hours.	Content
I	4	<p>Introduction</p> <p>Epidemiology-Incidence, Prevalence – Global, National, State and Local</p> <p>Disease burden, concept of cancer, risk factors</p> <p>Historical perspectives</p> <p>Trends and issues</p> <p>Principles of cancer management</p> <p>Roles and responsibilities of oncology nurse</p>
II	5	<p>The Nature of Cancer</p> <p>Normal cell biology</p> <p>The Immune system</p> <p>Pathological and pathophysiological changes in tissues</p> <ul style="list-style-type: none"> • Biology of the cancer cell • Clone formation Transformation • Tumor stem lines • Structure of a solid tumor • Products produced by the tumor • Systemic effects of tumor growth
III	4	<p>Etiology of Cancer</p> <p>Carcinogenesis,</p> <p>Theories of cancer causation</p> <p>Risk factors</p> <p>Carcinogens – genetic factors, chemical carcinogens, radiation, viruses, Immune system failure, rapid tissue proliferation</p> <p>Hormone changes, diet, emotional factors.</p>
IV	10	<p>Diagnostic Evaluation</p> <p>Health assessment: History taking, physical examination,</p> <p>Staging and grading of tumors,</p> <p>TNM Classification</p> <p>Common diagnostic tests</p> <ul style="list-style-type: none"> • Blood investigation: Haemetological, Bio-chemical, Tumor markers, Hormonal assay • Cytology: Fine needle aspiration cytology(FNAC) • Histopathology: Biopsy • Radiological assessment: MRI, Ultrasound, Computed tomography, Mammography, Positron emission tomography(PET), Radio nuclide imaging, Functional metabolism imaging • Endoscopies <p>Nurses responsibilities in diagnostic measures</p>

Unit	Hours.	Content
V	10	<p>Levels of prevention and care</p> <p>Primary prevention – Guidelines for cancer detection, general measures, Warning signs of cancer, Self examination-Oral, Breast, Testicular</p> <p>Secondary prevention – early diagnosis. Screening</p> <p>Tertiary prevention – disability limitation, Rehabilitation :Mobility , Speech, Bowel and bladder, Ostomies etc</p> <p>Patient and family education, Discharge instruction, follow-up care and use of community resources.</p>

Unit	Hours.	Content
VI	25	<p>Cancer Treatment Modalities and Nurse's Role</p> <p><i>Surgery</i></p> <ul style="list-style-type: none"> •Principles of surgical oncology •Current surgical strategy, •Determining surgical risk •Special surgical techniques •Pre-intra-postoperative nursing care •Acute and chronic surgical complications •Future directions and advances <p><i>Chemotherapy</i></p> <ul style="list-style-type: none"> •Principles and classification of chemotherapeutics •Pharmacology of anti neoplastic drugs- Mechanism of action, Absorption, protein binding, Bio-transformation, excretion, common side effects, drug toxicity •Calculating drug doses, • Therapeutic response to chemotherapy-Tumor variables, drug resistance, •Safety precautions <p><i>Radiation Therapy</i></p> <ul style="list-style-type: none"> •Physics of radiotherapy •Types of ionizing rays •Radiation equipments:Linear accelerator, cobalt, Implants,Isotopes, •Types of therapies: Oral, Brachy therapy, tele therapy, electron therapy •Effects of radiation on the body tissue, •Radiation biology – cell damage hypoxic cells, alteration of tumor kinetics. •Approaches to radiation therapy – •External radiotherapy •Internal radiotherapy – unsealed, •Sealed sources. •Effectiveness of radiotherapy-Radio sensitivity, treatment effects •Complications of radiotherapy •Radiation safety: Standards of Bhaba Atomic Research Centre(BARC)

Unit	Hours.	Content
		<p><i>Bone Marrow Transplantation /Stem Cell Transplantation</i></p> <ul style="list-style-type: none"> • Types, indications, transplantation procedure, complications and nursing management •Types and donor sources •Preparation and care of donor and recipient •Bone marrow bank •Legal and ethical issues <p><i>Immunotherapy (Biotherapy)</i></p> <ul style="list-style-type: none"> •Concepts and principles •Classification of agents •Treatment and applications <p><i>Gene Therapy</i></p> <ul style="list-style-type: none"> •Current Concepts and practices <p><i>Alternative and Complementary Therapies</i></p> <ul style="list-style-type: none"> •Current practices
VII	10	<p>Pain management:- Theories, types and</p> <ul style="list-style-type: none"> •Nature of cancer pain •Pathophysiology of pain •Pain threshold <p>Assessment of pain</p> <ul style="list-style-type: none"> •Principles of cancer pain control •Pharmacological: Opioid and non-opioid analgesic therapy •Patient controlled analgesia(PCA) •Other invasive techniques of pain control •Recent developments in Cancer pain <p>Non- Pharmacological pain relief technique-</p> <ul style="list-style-type: none"> • Complementary therapies(Music, massage, meditation, relaxation techniques, biofeedback back etc) •Psychological intervention in pain control •Alternative system of medicines <p>Role of nurse</p>

Unit	Hours.	Content
VIII	5	<p>Palliative care Definition and scope, philosophy Concept and elements of palliative care Global and Indian perspective of palliative care Quality of life issues Communication skill Nursing perspective of palliative care and its elements Home care Hospice care</p> <p>Role of nurse in palliative care</p>
IX	2	<p>Infection control:</p> <ul style="list-style-type: none"> • Process of infection, risk of hospitalization, nosocomial infections- prevention and control of infection in acute, long term care facility and community based care •Standard safety measures
X	30	<p>Nursing Care of Patients With Specific Malignant Disorders Malignancies of G.I. system-oral, oesophagus, stomach, rectal, liver & pancreas, care of ostomies/stoma Respiratory malignancies Genito urinary system malignancies- prostate Bladder, renal testicular malignancies, Gynecological malignancies-cervix, uterus, ovary Hematological malignancies-Lymphomas, Leukemias. Malignancies of musculoskeletal system Endocrine malignancies Skin Head and Neck -brain tumors Other malignancies – Breast cancer, AIDS related Malignancies (Kaposi's Sarcoma)</p>
XI	10	<p>Paediatric malignancies Leukemia, Lymphoma, Neuro- blastoma Wilm's tumor, Soft tissue sarcoma, Retinoblastoma Nursing Management of children with Paediatric Malignancies</p>

Unit	Hours.	Content
XII	15	<p>Nursing Management of Physiological Conditions and Symptoms Of Cancer Patient</p> <p>Nutrition:- effects of cancer on nutritional status and its consequences:-Anemia, electrolyte imbalances, taste alterations</p> <p>Impaired mobility: Decubitus ulcer, pathologic fractures, thrombophlebitis, pulmonary embolism, contractures, footdrop</p> <p>Other symptoms</p> <p>Dyspepsia & hiccup, dyspnoea intestinal obstruction, Fungating wounds Anxiety & depression, insomnia Lymph edema</p> <p>Impact of cancer on sexuality:</p> <p>Effects of radiotherapy/ chemotherapy/surgery on sexuality of the cancer patient Nursing management of cancer patients experiencing sexual dysfunction Sexual counseling</p>
XIII	10	<p>Cancer Emergencies</p> <p>Disseminated intravascular coagulation(DIC), Malignant pleural effusion Neoplastic cardiac tamponade and septic shock spinal cord compression Superior venacava syndrome Metabolic emergency: hyper and hypo calcemia Surgical emergency Urological emergency Hemorrhage Organ obstruction Brain metastasis Nurses role in managing oncologic emergencies</p>

Unit	Hours.	Content
XIV	8	<p>Psycho-Social Aspects of Nursing Care Psychological responses of patients with cancer Psychosocial assessment – Crisis intervention, coping mechanisms Stress management, spiritual/cultural care and needs Counseling: individual and family Maximizing quality of life of patient and family</p> <p>Ethical, moral and legal issues- End of life care Grief and grieving process Bereavement support Care of Nurses who care for the dying.</p>
XV	2	<p>Layout and Design of an oncology institution/ ward,OPD, chemotherapy unit, Bone marrow transplantation unit, Pain clinic etc Practice Standards of oncology nursing •Policies and Procedures Establishing Standing orders and Protocols</p> <p>Quality Assurance Programme in oncology units Nursing audit</p>

Clinical Experience

S. No.	Dept./ Unit	No. of Week	Total Hours
1	Medical Oncology ward	7	210 Hours
2	Surgical Oncology ward	6	180 Hours
3	Bone marrow transplantation Unit	2	60 Hours
4	Operation Theatre	2	60 Hours
5	Radiotherapy Unit	3	90 Hours
6	Chemotherapy Unit	4	120 Hours
7	Out patient department and pain clinic	2	60 Hours
8	Pediatric Oncology ward	2	60 Hours
9	Palliative Care ward	3	90 Hours
10	Community oncology	2	60 Hours
11	Hospice	1	30 Hours
12	Other field visits	1	30 Hours
	Total	35Weeks	1050 Hours

Procedures Observed

- 1.CT Scan
- 2.MRI
- 3.PET Scan(Positron Emission Tomography)
- 4.Ultra sound
- 5.Mammography
- 6.Radio Nuclide Imaging
- 7.Bone Scan
- 8.Thyroid Function Test
- 9.Functional and Metabolic Imaging
- 10.Transportation of radioactive materials
- 11.Others

Procedures Assisted

- 1.IV cannulation – Open method
- 2.Chemotherapy
- 3.Radiotherapy – Brachytherapy – Low Density Radiation, High Density Radiation.
- 4.Interstitial implantation
- 5.Bio-therapy and Gene therapy
- 6.Teletherapy – Treatment planning
- 7.Bone marrow aspiration and biopsy
- 8.Biopsy – tissue
- 9.FNAC – Fine Needle Aspiration Cytology and biopsy

10. Advance Cardiac life support
11. Endotracheal intubation
12. Defibrillation Ventilation
13. Tracheostomy
14. Thoracentesis
15. Paracentesis
16. Lumbar Puncture
17. Arterial Blood Gas
18. Nerve Block
19. Chest tube insertion
20. Intercostal drainage
21. CVP monitoring

Procedure Performed

1. Screening for cancer
2. Assessment of pain
3. Assessment of Nutritional status
4. Care of Tracheostomy
5. Endotracheal intubation
6. Gastric gavage
7. Pap smear
8. IV cannulation
9. Care of surgical flaps
10. Care of ostomies
11. Blood transfusion and component therapy
12. Counseling
13. Practice standard safety measures
14. Care of dead body and mortuary formalities

Other procedures

(As per the institutional protocol):

1. Alternative therapies

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING- NEUROSCIENCES NURSING

Placement : II Years

Hours of Instruction
Theory – 150 hrs
Practical- 1050hrs
Total : 1200 hrs

Course Description

This course is designed to assist students in developing expertise and in- depth knowledge in the field of neurology and neurosurgical Nursing. It will help students

to develop advanced skills for nursing intervention in caring for patients with neurological and neurosurgical disorders. It will enable the student to function as neuroscience nurse practitioner/ specialist.

It will further enable the student to function as educator, manager and researcher in the field of neurology and neurosurgical Nursing.

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to neurology and neurosurgical Nursing.
2. Review the anatomy and physiology of nervous system
3. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of patients with neurological and neurosurgical disorders
4. Perform neurological assessment and assist in diagnostic procedures
5. Describe the concepts and principles of neuroscience nursing
6. Describe the various drugs used in neurosciences and nurses responsibility
7. Assist in various therapeutic and surgical procedures in neuroscience nursing
8. Demonstrate advance skills/competence in managing patients with neurological and neurosurgical disorder following nursing process approach
9. Identify psychosocial problems of patients with disabilities and assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
10. Participate in preventive, promotive and rehabilitative services for neurological and neurosurgical patients.
11. Explain the legal and ethical issues related to brain death, organ transplantation and practice of neuroscience nursing
12. Incorporate evidence based nursing practice and identify the areas of research in the field of neuroscience nursing
13. Organise and conduct inservice education program for nursing personnel.
14. Develop standards of care for quality assurance in neuroscience nursing practice

15. Identify the sources of stress and manage burnout syndrome among health care providers.
16. Teach and supervise nurses and allied health workers.
17. Plan and develop physical layout of neuro intensive care unit

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <p>Introduction to neuroscience(neurological and neurosurgical) nursing</p> <ul style="list-style-type: none"> • History-Development in neurological and neurosurgical nursing, Service & education • Emerging trends and issues in neurology and neuro surgery and its implication to nursing. • neurological and neurosurgical problems – • Concepts, principles and nursing perspectives • Ethical and legal issues • Evidence based nursing and its application in neurological and neurosurgical nursing
II	5	<p>Epidemiology</p> <p>Major health problems- Risk factors associated with neurological conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations, occupational and infections. Health promotion, disease prevention, life style modification and its implications to nursing</p> <p>Alternate system of medicine/complementary therapies</p>
III	10	<p>Review of Anatomy and physiology</p> <p>Embryology Structure and functions of Nervous system- CNS, ANS, cerebral circulation , cranial and spinal nerves and reflexes, motor and sensory functions Sensory organs</p>

Unit	Hours	Content
IV	15	<p>Assessment and diagnostic measures</p> <p>Assessment</p> <ul style="list-style-type: none"> • History taking • Physical assessment, psychosocial assessment • Neurological assessments, Glasgow coma scale interpretation & its relevance to nursing. • Common assessment abnormalities <p>Diagnostic measures</p> <ul style="list-style-type: none"> • Cerebro spinal fluid analysis • Radiological studies-Skull and spine X-ray Cerebral Angiography, CT Scan, Single Photon Emission Computer Tomography(SPECT), MRI (Magnetic Resonance Imaging), MRA, MRS, Functional MRI, Myelography, PET (Positron Emission Test), Interventional radiology. • Electorgraphic studies- Electro encephalo graphy, MEG, EMG, video EEG, • Nerve conduction studies-Evoked potentials, visual evoked potentials, • Ultrasound studies-Carotid duplex, transcranial Doppler sonography, • Immunological studies • Biopsies – muscle, nerve and Brain. <p>Interpretation of diagnostic measures Nurse's role in diagnostic tests</p>
V	5	<p>Meeting Nutritional needs of neurological patients</p> <p>Basic nutritional requirements Metabolic changes following injury and starvation Nutritional assessment Common neurological problems that interfere with nutrition and strategies for meeting their nutritional needs Special metabolic and electrolyte imbalances Chronic fatigue syndrome</p>
VI	5	<p>Drugs used in neurological and neurosurgical disorders</p> <p>Classification Indications, contraindications, actions and effects, toxic effects</p> <p>Role of nurse</p>

Unit	Hours	Content
VII	10	<p>Traumatic conditions. Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis, Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> •Cranio cerebral injuries. •Spinal & Spinal cord injuries. •Peripheral nerve injuries. •Unconsciousness
VIII	10	<p>Cerebro vascular disorders. pathophysiology, Clinical types, Clinical features,diagnosis, Prognosis , Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> •Stroke & arterio venous thrombosis. •Haemorrhagic embolus. •Cerebro vascular accidents. •Intracranial aneurysm. •Subarchnoid Haemorrhage. •Arterio venous fistula. •Brain tumors <p>Diseases of cranial nerves; Trigeminal neuralgia, Facial palsy, Bulbar palsy.</p>
IX	10	<p>Degenerating and desalinating disorders Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Motor neuron diseases. • Movement disorders- Tics, dystopia, chorea, Wilson's disease, essential tremors • Dementia. • Parkinson's disease. • Multiple sclerosis. • Alzheimer's

Unit	Hours	Content
X	10	<p>Neuro infections Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of Neuro infections</p> <ul style="list-style-type: none"> • Meningitis-types • Encephalitis. • Poliomyelitis. • Parasitic infections. • Bacterial infections • Neurosyphilis. • HIV & AIDS. • Brain abscess.
XI	10	<p>Paroxysmal disorders. Causes, pathophysiology, Clinical types, Clinical features, diagnosis, Prognosis , Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Epilepsy and seizures. • Status epilepticus. • Syncope. • Menier's syndrome. • Cephalgia.
XII	10	<p>Developmental disorders. Causes, pathophysiology, Clinical types, Clinical features,diagnostic, Prognosis Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Hydrocephalus. • Craniosynostosis. • spina bifida- Meningocele, Meningomyelocele encephalocele • syringomyelia. • Cerebro vascular system anomalies. • Cerebral palsies. • Down's syndrome
XIII	10	<p>Neuro muscular disorders. Causes, pathophysiology, Clinical types, Clinical features,diagnostic, Prognosis, Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Polyneuritis – G B Syndrome.s • Muscular dystrophy. • Myasthenia gravis. • Trigeminal neuralgia. • Bell's palsy. • Menier's disease • Carpal tunnel syndrome • Peripheral neuropathies

Unit	Hours	Content
XIV	5	<p>Neoplasms – surgical conditions. Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis , Nursing management of</p> <ul style="list-style-type: none"> • Space occupying lesions -types • Common tumors of CNS,
XV	5	<p>Other disorders Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of Metabolic disorders- diabetes, insipidus, metabolic encephalopathy Sleep disorders Autoimmune disorders- multiple sclerosis inflammatory myopathies</p>
XVI	10	<p>Neuro emergencies Causes, pathophysiology, Clinical types, Clinical features, diagnostic, Prognosis, Management: medical, surgical and Nursing management of</p> <ul style="list-style-type: none"> • Increased intra cranial pressure • Unconscious • Herniation syndrome • Seizures • Severe head injuries • Spinal injuries • Cerebro vascular accidents
XVII	5	<p>Rehabilitation. Concept and Principles of Rehabilitation. Factors affecting quality of life and coping Rehabilitation in acute care setting, and following stroke, head injury and degenerative disorders of brain Physiotherapy. Counselling Care giver's role</p> <p>Speech & Language.-Neurogenic communication disorders, Speech therapy</p>
XVIII	5	<p>Ethical and legal issues in neuroscience nursing Brain death and organ transplantation Euthanasia Negligence and malpractice Nosocomial infections</p>

Unit	Hours	Content
XIX	5	Quality assurance in neurological nursing practice Role of advance practitioner in neurological nursing Professional practice standards Quality control in neurologic nursing Nursing audit Neuro ICU <ul style="list-style-type: none"> • Philosophy, aims and objectives • Policies, staffing pattern, design and physical plan of neuro ICU • Team approach, functions • Psychosocial aspects in relation to staff and clients of neuro ICU, • In-service education

Practical

Total = 1050 Hours

1 Week = 30 Hours

S.No.	AREA OF POSTING	No. of Week	Total Hours

1. CT scan
2. MRI
3. PET
4. EEG
5. EMG
6. Sleep pattern studies/Therapy
7. Radiographical studies
8. Neuro surgeries
9. Nerve conduction studies
10. Ultrasound studies
11. Any other

II. Procedures Assisted

1. Advanced Cardiac life support
2. Lumbar Puncture
3. Biopsies – muscle, nerve and Brain
4. Arterial Blood Gas
5. ECG Recording

6. Blood transfusion
7. IV cannulation – open method

8. Endotracheal intubation
9. Ventilation
10. Tracheostomy
11. ICP monitoring
12. Gama Knife
13. Cereberal angiography
14. Myelography
15. Neuro surgeries

III. Procedures Performed:

1. Airway management
 - a. Application of OroPharyngeal Airway
 - b. Care of Tracheostomy
 - c. Conduct Endotracheal Intubation
 - d. use of AMBU bag, artificial respirators
 - e. Setting of Ventilators and Care of patients on ventilators
2. Cardio Pulmonary Resuscitation -Defibrillation
3. Neurological assessment -Glasgow coma scale
4. Gastric Lavage
5. IV Cannulation
6. Administration of emergency IV Drugs, fluid
7. Care of patients with incontinence, bladder training
Catheterization
8. Care of patients on traction related to the neurological conditions
9. Blood Administration.
10. Muscle strengthening exercises
11. Guidance and counseling
12. Monitoring – management and care of monitors.

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Nephro and urological Nursing. It will help students to develop advanced skills for nursing intervention in various nephro and urological conditions. It will enable the student to function as nephro and urology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of nephro and urology nursing

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to nephro and urological nursing
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of nephro and urological conditions
3. Perform physical, psychosocial & spiritual assessment
4. Assist in various diagnostic, therapeutic and surgical interventions
5. Provide comprehensive nursing care to patients with nephro and urological conditions
6. Describe the various drugs used in nephro and urological conditions and nurses responsibility
7. Demonstrate skill in handling various equipments/gadgets used for patients with nephro and urological conditions
8. Appreciate team work & coordinate activities related to patient care.
9. Practice infection control measures.
10. Identify emergencies and complications & take appropriate measures
11. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
12. Discuss the legal and ethical issues in nephro and urological nursing
13. Identify the sources of stress and manage burnout syndrome among health care providers
14. Appreciate the role of alternative system of medicine in the care of patient
15. Incorporate evidence based nursing practice and identify the areas of research in the field of nephro and urological nursing
16. Teach and supervise nurses and allied health workers.
17. Design a layout of kidney transplant unit and dialysis unit
18. Develop standards of nephro urological nursing practice

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <p>Historical development: trends and issues in the field of nephro and urological nursing.</p> <p>nephro and urological problems</p> <p>Concepts, principles and nursing perspectives</p> <p>Ethical and legal issues</p> <p>Evidence based nursing and its application in nephro and urological nursing(to be incorporated in all the units)</p>
II	5	<p>Epidemiology</p> <p>Major health problems- urinary dysfunction, urinary tract infections, Glomerular disorders, obstructive disorders and other urinary disorders</p> <p>Risk factors associated with nephro and urological conditions</p> <p>conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations</p> <p>Health promotion, disease prevention, life style modification and its implications to nursing</p> <p>Alternate system of medicine/complementary therapies</p>
III	5	<p>Review of anatomy and physiology of urinary system</p> <p>Embryology</p> <p>Structure and functions</p> <p>Renal circulation</p> <p>Physiology of urine formation</p> <p>Fluid and electrolyte balance</p> <p>Acid base balance</p> <p>Immunology specific to kidney</p>
IV	20	<p>Assessment and diagnostic measures</p> <p>History taking</p> <p>Physical assessment, psychosocial assessment</p> <p>Common assessment abnormalities-dysurea, frequency, enuresis, urgency, hesitancy, hematuria, pain, retention, burning on urination, pneumaturia, incontinence, nocturia, polyurea, anuria, oliguria,</p> <p>Diagnostic tests-urine studies, blood chemistry, radiological procedures-KUB, IVP,nephrotomogram, retrograde pyelogram, renal arteriogram, renal ultrasound, CT scan, MRI, cystogram, renal</p>

Unit	Hours	Content
		<p>scan, biopsy, endoscopy-cystoscopy, urodynamics studies- cystometrogram, urinary flow study, sphincter electromyography, voiding pressure flow study, videourodynamics, Whitaker study</p> <p>Interpretation of diagnostic measures</p> <p>Nurse's role in diagnostic tests</p>
V	5	<p>Renal immunopathy/Immunopathology General Concept of immunopathology Immune mechanism of glomerular vascular disease Role of mediator systems in glomerular vascular disease</p>
VI	15	<p>Urological Disorders and Nursing Management Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical, surgical and nursing management of Urinary tract infections- pyelonephritis, lower urinary Disorders for ureters, bladder and urethra Urinary tract infections- Urinary dysfunctions- urinary retention, urinary incontinence, urinary reflux, Bladder disorders- neoplasms, calculi, neurogenic bladder, trauma, congenital abnormalities Benign prostatic hypertrophy(BPH) Ureteral disorders: ureteritis, ureteral trauma, congenital anomalies of ureters Urethral disorders- tumours, trauma, congenital anomalies of ureters,</p>
VII	25	<p>Glomerular disorders and nursing management Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical, surgical and nursing management of Glomerular nephritis- chronic, acute, nephritic syndrome Acute Renal failure and chronic renal failure. Renal calculi Renal tumours-benign and malignant Renal trauma Renal abscess Diabetic nephropathy Vascular disorders Renal tuberculosis Polycystic Congenital disorders Hereditary renal disorders</p>

Unit	Hours	Content
VIII	10	Management of Renal emergencies Anuria Acute Renal failure Poisoning Trauma Urine retention Acute graft rejection Hematuria Nurse's role
IX	10	Drugs used in urinary disorders Classification Indications, contraindications, actions and effects, toxic effects Role of nurse
X	10	Dialysis Dialysis- Historical, types, Principles, goals <ul style="list-style-type: none"> • Hemodialysis- vascular access sites- temporary and permanent • Peritoneal dialysis Dialysis Procedures- steps, equipments, maintenance, Role of nurse- pre dialysis, intra and post dialysis Complications- Counseling patient education Records and reports
XI	10	Kidney transplantation Nursing management of a patient with Kidney transplantation Kidney transplantations- a historical review Immunology of graft rejections The recipient of a renal transplant Renal preservations Human Leucocytic Antigen(HLA) typing matching and cross matching in renal transplantation Surgical techniques of renal transplantations Chronic renal transplant rejection Complication after KTP: Vascular and lymphatic, Urological, cardiovascular, liver and neurological, infectious complication KTP in children and management of pediatric patient with KTP KTP in developing countries Results of KTP Work up of donor and recipient for renal transplant Psychological aspect of KTP and organ donations Ethics in transplants Cadaveric transplantation

Unit	Hours	Content
XII	5	Rehabilitation of patient with nephrological problems Risk factors and prevention Rehabilitation of patients on dialysis and after kidney transplant Rehabilitation of patients after urinary diversions Family and patient teaching
XIII	10	Pediatric urinary disorders Etiology, clinical manifestations, diagnosis, prognosis, children with Renal Diseases -UTI, ureteral reflux, glomerulo nephritis, nephrotic syndrome infantile nephrosis, cystic kidneys, familial factors in renal diseases in childhood, Haemolytic uraemic

Unit	Hours	Content
		syndrome. Benign recurrent haematuria, nephropathy, tumour
XIV	5	Critical care units- dialysis , KTP unit Philosophy, aims and objectives Policies, staffing pattern, design and physical plan of Dialysis and KTP units Team approach, functions Psychosocial aspects in relation to staff and clients of ICU, dialysis unit In-service education Ethical and legal issues
XV	5	Quality assurance in nephrological nursing practice Role of advance practioner in nephrological nursing Professional practice standards Quality control in nephrological nursing Nursing audit

Practicals

Total = 1 050 Hours
1 Week = 30 Hours

S. No.	Dept./ Unit	No. of Week	Total Hours
1	Nephrology Ward	6	180 Hours
2	Pediatrics	2	60 Hours
3	Critical Care Unit	3	90 Hours
4	Urology Ward	6	180 Hours
5	Dialysis Unit	5	150 Hours
6	Kidney Transplantation Unit	2	60 Hours
7	URO OT	3	90 Hours
8	Emergency Wards	2	60 Hours
9	Uro Nephro OPDs	4	120 Hours
10	Diagnostic Labs	2	60 Hours
	Total	35 Weeks	1050 Hours

Procedures observed

I. Procedures Observed

1. CT Scan
2. MRI
3. Radiographic studies
4. Urodynamics
5. Hemodialysis
6. Renal Surgeries

II. Procedures Assisted

1. Blood transfusion
2. IV cannulation therapy
3. Arterial Catheterization
4. Insertion of central line/cvp line
5. Connecting lines for dialysis
6. Peritoneal dialysis
7. Renal biopsy
8. Endoscopies- Bladder, urethra

III. Procedure Performed

1. Health assessment
2. Insertion of urethral and supra pubic catheters
3. Urine analysis
4. Catheterisation
5. Peritoneal dialysis
6. Bladder irrigation
7. Care of ostomies
8. Care of urinary drainage
9. Bladder training
10. Care of vascular access
11. Setting up dialysis machine and starting, monitoring and closing dialysis
12. Procedures for prevention of infections:
13. Hand washing, disinfection & sterilization surveillance, and fumigation universal precautions.
14. Collection of specimen.
15. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, blood administration. monitoring -fluid therapy, electrolyte imbalance,
16. Nutritional needs , diet therapy & patient education.
17. Counseling

IV. OTHER PROCEDURES:

Weightage for Internal Assessment: (common to all speciality)

A Theory

Term Test: 30
Assignment: 20

B Practical

Practical Examination : 50
Clinical Evaluation : 20

CLINICAL SPECIALITY – II

MEDICAL SURGICAL NURSING -ORTHOPEDIC NURSING

Placement :II Year

Hours of Instruction
Theory : 150 Hours
Practical : 1050hrs
Total : 1200 Hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of orthopedic nursing. It will help students to develop advanced skills for nursing intervention in various orthopedic conditions. It will enable the student to function as orthopedic nurse practitioner/specialist providing quality care. It will further enable the student to function as educator, manager, and researcher in the field of orthopedic nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate the history and developments in the field of orthopedic nursing
2. Identify the psycho-social needs of the patient while providing holistic care.
3. Perform physical and psychological assessment of patients with orthopedic conditions and disabilities.
4. Describe various disease conditions and their management
5. Discuss various diagnostic tests required in orthopedic conditions
6. Apply nursing process in providing care to patients with orthopedic conditions and those requiring rehabilitation.
7. Recognize and manage orthopedic emergencies.
8. Describe recent technologies and treatment modalities in the management of patients with orthopedic conditions and those requiring rehabilitation.
9. Integrate the concept of family centered, long term care and community based rehabilitation to patients with orthopedic conditions.
10. Counsel the patients and their families with orthopedic conditions
11. Describe various orthodontic and prosthetic appliances
12. Appreciate the legal and ethical issues pertaining to patients with orthopedic conditions and those requiring rehabilitation.
13. Appreciate the role of alternative system of medicine in care of patients with orthopedic conditions

Unit	Hours	Content
		Head injury Chest injury <ul style="list-style-type: none"> •Polytrauma •Nerve injuries •Vascular injuries •Soft tissue injuries •Sports injuries •Amputation
V	8	Infections of Bones and Joint Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis, management, medical surgical and nursing management of : <ul style="list-style-type: none"> •Tuberculosis •Osteomyelitis •Arthritis •Leprosy
VI	5	Bone Tumours Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis, management, medical surgical and nursing management of: <ul style="list-style-type: none"> •Bone tumors – Benign, Malignant and metastatic •Different types of therapies for tumors
VII	10	Deformities Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis – medical surgical and nursing management of: Scoliosis, Kyphosis, Lordosis Congenital disorders: Congenital dislocation of hip (CDH), Dislocation of patella, knee, Varus and valgus deformities, Deformities of digits, Congenital torticollis. Meningocele, meningomyelocele, spina bifida, Chromosomal disorders. Computer related deformities
VIII	5	Disorders of the spine Intervertebral disc prolapse, Fracture of the spine Low back disorder – Low back pain, PND, spinal stenosis, Spondylosis

Unit	Hours	Content
IX	5	<p>Nutritional/Metabolic and Endocrine Disorders Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis, medical surgical and nursing management of:</p> <ul style="list-style-type: none"> •Rickets, •Scurvy, •Hyper vitaminosis A and D, •Osteomalacia, •Osteoporosis •Paget’s disease, •gout, •Gigantism, •Dwarfism, •Acromegaly. •Therapeutic diets for various orthopedic disorders
X	8	<p>Neuro-Muscular Disorders: Causes, pathophysiology, clinical types, clinical features, diagnosis, prognosis medical surgical and nursing management of:</p> <ul style="list-style-type: none"> •Poliomyelitis, Cerebral Palsy •Myasthenia gravis •Spina bifida. •Peripheral nerve lesion, •Paraplegia, Hemiplegia, Quadriplegia. • Muscular dystrophy

XII	5	<p>Orthopedic Disorders in Children: General and special consideration on pediatric orthopedics Genetic disorders Congenital anomalies Growth disorders Genetic counseling Nurses role in genetic counseling</p>
XIII	5	<p>Geriatric Problems Geriatric population, types of disabilities, causes, treatment and Management – Hospitalization, rest, physiotherapy, involvement of family members, social opportunities. Care at home – involvement of family and community, follow up care and rehabilitation</p>

Unit	Hours	Content
XIV	6	<p>Pharmacokinetics</p> <ul style="list-style-type: none"> Principles of drug administration Analgesics and anti inflammatory agents Antibiotics, Antiseptics, Drugs used in orthopedics and neuromuscular disorders Blood and blood components Care of drugs and nurses role
XV	30	<p>Nurses Role in Orthopedic Conditions</p> <ul style="list-style-type: none"> Gait analysis Urodynamic studies Prevention of physical deformities Alteration of body temperature regulatory system and immune systems Immobilization – cast, splints, braces and tractions Prevention and care of problems related to immobility Altered sleep patterns Impaired communication Self care and activities of daily living Bladder and bowel rehabilitation Sensory function rehabilitation Psychological reaction related to disabilities and disorders. Coping of individual and family with disabilities and disorders Maintaining sexuality Spirituality – A rehabilitative prospective <p>Orthopedic Reconstructive Surgeries</p> <ul style="list-style-type: none"> Replacement surgeries – Hip, Knee, Shoulder Spine surgeries Grafts and flaps surgery Deformity correction. <p>Physiotherapy</p> <ul style="list-style-type: none"> Concepts, Principles, purpose, •Mobilization – Exercises: types, re-education in walking: Crutch walking, wheel chair, Transfer techniques, •Types of gaits: Non-weight bearing, partial weight bearing, four point crutch, tripod, walking with sticks, calipers •Forms of therapies: Hydrotherapy, electrotherapy, wax bath, heat therapy, ice, helio therapy, radiant heat, •Chest physiotherapy

Unit	Hours	Content
XVI	8	<p>Rehabilitation</p> <p>Principles of rehabilitation, definition, philosophy, process, Various types of therapies Special therapies and alternative therapies Rehabilitation counseling Preventive and restorative measures. Community based rehabilitation (CBR) Challenges in rehabilitation. Role of the nurse in rehabilitation, Legal and ethical issues in rehabilitation nursing Occupational therapy</p>
XVII	5	<p>National Policies and Programmes</p> <p>National programmes for rehabilitation of persons with disability - National Institutes, artificial limbs manufacturing Corporation, District Rehabilitation Centers and their schemes Regional rehabilitation centers etc Public policy in rehabilitation nursing The persons with disabilities act 1995, Mental rehabilitation and Multiple disabilities act 1992, The National Trust Rules 1999 and 2000 Rehabilitation Council of India Legal and ethical aspects in orthopedic nursing Rehabilitation health team and different categories of team members.</p>
XVIII	4	<p>Quality assurance</p> <p>Standards, Protocols, Policies, Procedures Nursing audit Staffing Design of orthopedic, physiotherapy and rehabilitation unit</p>

Practicals

1. Clinical practice in Orthopedic, physiotherapy and Rehabilitation Units.
2. Application of tractions and plaster casts and removal of tractions and plaster casts and other appliances.
3. Apply Theories and Nursing Process in the management of patients with orthopedic conditions.
4. Provide various types of physical and rehabilitative therapies
5. Provide health education on related disease conditions.
6. Unit management and plan - designing

Clinical Experience

Total = 1050 Hours
1 Week = 30 Hours

S. No.	Dept./Unit	No. of Week	Total Hours
1	Orthopedic Ward	8	240 Hours
2	Orthopedic Operation theater	5	150 Hours
3	Neurosurgical Ward	3	90 Hours
4	Orthopedic O.P.D.	4	120 Hours
5	Casualty/Emergency and Trauma	5	150 Hours
6	Rehabilitation Units	2	60 Hours
7	Physiotherapy Unit	4	120 Hours
8	Paediatric /paediatric surgery unit	2	60 Hours
9	Field Visit	2	60 Hours
	Total	35 Weeks	1050 Hours

Procedures Observed

1. X Ray
2. Ultrasound
3. MRI
4. C T Scan/bone scan
5. Arthroscopy
6. Electrothermally – assisted capsule shift or ETAC (Thermal capsulorrhaphy)
7. Fluroscopy
8. Electromyography
9. Myelography
10. Discography
11. Others

Procedures Assisted

1. Blood Transfusion
2. IV cannulation and therapy
3. Ventilation
4. Various types of tractions
5. Orthopedic surgeries – Arthrocentesis, Arthroscopy, Bone lengthening, Arthrodesis, grafting, Fractures fixation, reconstructive, reimplantation, replantation, spinal decompression, transplantation of bone, muscle or articular cartilage, autografting, allografting.
6. Injection – Intra articular, intra osseous.
7. Advance Life Support

CLINICAL SPECIALITY - II

MEDICAL SURGICAL NURSING - GASTRO ENTEROLOGY NURSING

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of gastro enterology Nursing. It will help students to develop advanced skills for nursing intervention in various gastro enterology conditions. It will enable the student to function as gastro enterology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of gastro enterology nursing

Objectives

At the end of the course the students will be able to

1. Appreciate trends and issues related to gastro enterology nursing
2. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of gastrointestinal conditions
3. Participate in national health programs for health promotion, prevention and rehabilitation of patients with gastrointestinal conditions
4. Perform physical, psychosocial & spiritual assessment
5. Assist in various diagnostic, therapeutic and surgical procedures
6. Provide comprehensive care to patients with gastrointestinal conditions
7. Describe the various drugs used in gastrointestinal conditions and nurses responsibility
8. Demonstrate skill in handling various equipments/gadgets used for patients with gastrointestinal conditions
9. Appreciate team work & coordinate activities related to patient care.
10. Practice infection control measures.
11. Identify emergencies and complications & take appropriate measures
12. Assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
13. Discuss the legal and ethical issues in GE nursing
14. Identify the sources of stress and manage burnout syndrome among health care providers
15. Appreciate the role of alternative system of medicine in care of patient
16. Incorporate evidence based nursing practice and identify the areas of research in the field of gastrointestinal nursing
17. Teach and supervise nurses and allied health workers.
18. Design a layout of Gastro enterology intensive care unit (GEICU) , liver care/transplant unit

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <p>Historical development: trends and issues in the field of gastro enterology. Gastro numerological problems Concepts, principles and nursing perspectives Ethical and legal issues Evidence based nursing and its application in gastrointestinal nursing(to be incorporated in all the units)</p>
II	5	<p>Epidemiology</p> <p>Risk factors associated with GE conditions-Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations Health promotion, disease prevention, life style modification and its implications to nursing National health programmes related to gastro enterology Alternate system of medicine/complementary therapies</p>
III	5	<p>Review of anatomy and physiology of gastrointestinal system</p> <p>Gastrointestinal system Liver, biliary and pancreas Gerontological considerations Embryology of GI system Immunology specific to GI system</p>
IV	15	<p>Assessment and diagnostic measures</p> <p>History taking Physical assessment, psychosocial assessment Diagnostic tests</p> <ul style="list-style-type: none"> •Radiological studies:Upper GIT- barium swallow, lower GIT- Barrium enema, •Ultra sound: •Computed tomography •MRI •Cholangiography: Percutaneous transheptic Cholangiogram(PTC) •Magnetic Resonance Cholangio pancreotography (MRCP) •Nuclear imaging scans(scintigraphy) •Endoscopy

Unit	Hours	Content
		<ul style="list-style-type: none"> •Colonoscopy •Proctosigmoidoscopy •Endoscopic Retrograde Cholangio pancreatography (ERCP) •Endoscopic ultrasound •Peritonoscopy(Laproscopy) •Gastric emptying studies •Blood chemistries: Serum amylase, serum lipase •Liver biopsy •Miscellaneous tests:Gastric analysis, fecal analysis •Liver function tests: Bile formation and excretion, dye excretion test, Protein metabolism, haemostatic functions- prothrombin vitamin K production, serum enzyme tests,Lipid metabolism- serum cholesterol <p>Interpretation of diagnostic measures</p> <p>Nurse's role in diagnostic tests</p>

V	25	<p>Gastro intestinal disorders and nursing management</p> <p>Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical , surgical and nursing management of</p> <ul style="list-style-type: none"> • Disorders of the mouth: Dental caries, Peridontal disease, Acute tooth infection, Stomatitis, Thrush (moniliasis), Gingivitis, Leukoplakia, Inflammation of the parotid gland, Obstruction to the flow of saliva, Fracture of the jaw • Disorders of the oesophagus: Reflux oesophagitis, Oesophageal achalasia, Oesophageal varices, Hiatus hernia, Diverticulum • Disorders of the stomach and duodenum: Gastritis, Peptic ulcer, Dumping of the stomach, Food poisoning, idiopathic gastroparesis, Aerophagia and belching syndrome, Ideopathic cyclic nausea and vomiting, Rumination syndrome, Functional dyspepsia, Chronic Non specific (functional) abdominal pain • Disorders of the small intestine <ul style="list-style-type: none"> – Malabsorption syndrome – tropical sprue – Gluten – sensitive enteropathy (Coeliac disease) <ul style="list-style-type: none"> – Inflammatory diseases of intestines and abdomen,; appendicitis, – Chronic inflammatory bowel disease, Ulcerative colites, crohn’s disease – Infestations and infections – Worm infestations, Typhoid, Leptospirosis – Solitary rectal ulcer syndrome <ul style="list-style-type: none"> – Alteration in bowel elimination (diarrhoea, constipation, fecal impaction, fecal incontinence, Irritable bowel syndrome, Chronic <p>Anorectal Conditions: Hemorrhoids, Anal fissure, Anal fistula, Abscess, Strictures, Rectal prolapse, Pruritis ani, Pelonidal disease, Anal condylomas, Warts</p>
---	----	---

Unit	Hours	Content
VI	15	<p>Disorder of liver, pancreas gall bladder and nursing management</p> <p>Disorders of liver biliary tract :</p> <p>Viral Hepatitis – A, B, C, D & E</p> <p>Toxic hepatitis</p> <ul style="list-style-type: none"> •Cirrhosis of liver, liver failure, Liver transplantation •Non cirrhotic portal fibrosis •Liver abscess,; •Parasitic and other cysts of the liver •Disorders of the Gall Bladder and Bile Duct: <p>Cholecystitis</p> <p>Cholelithiasis</p> <p>Choledocholithiasis</p> <p>Disorders of the pancreas: Pancreatitis,</p> <p>Benign tumors of islet cells</p> <p>Disorders of the Peritoneum</p> <ul style="list-style-type: none"> •Infections of the peritoneum <p>Surgical peritonitis</p> <p>Spontaneous bacterial peritonitis</p> <p>Tuberculosis peritonitis</p> <p>Disorders of the Diaphragm</p> <ul style="list-style-type: none"> •Diaphragmatic hernia •Congenital hernias •Paralysis of diaphragm •Tumors of the diaphragm <p>Hiccups</p>

9. Plan of inservice education programme for nursing staff and Class-IV employees
10. Counseling

CLINICAL SPECIALTY –II
PEDIATRIC (CHILD HEALTH) NURSING

Placement : II Year

Hours of Instruction

Theory 150 hours

Practical 1050hours

Total : 1200 hours

Course Description

This course is designed to assist students in developing expertise and in- depth understanding in the field of Pediatric Nursing. It will help students to develop advanced skills for nursing intervention in various pediatric medical and surgical conditions. It will enable the student to function as pediatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

Objectives

At the end of the course the students will be able to:

1. Apply the nursing process in the care of ill infants to pre adolescents in hospital and community
2. Demonstrate advanced skills/competence in nursing management of children with medical and surgical problems
3. Recognize and manage emergencies in children
4. Provide nursing care to critically ill children
5. Utilize the recent technology and various treatment modalities in the management of high risk children
6. Prepare a design for layout and describe standards for management of pediatric units/hospitals
7. Identify areas of research in the field of pediatric nursing

Course Content

Unit	Hours	Content
I	5	<p>Introduction</p> <p>Current principles, practices and trends in Pediatric Nursing</p> <p>Role of pediatric nurse in various settings -Expanded and extended</p>
II	35	<p>Pathophysiology, assessment(including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities and nursing intervention in selected pediatric medical disorders</p> <ul style="list-style-type: none"> • Child with respiratory disorders: <ul style="list-style-type: none"> - Upper respiratory tract: choanal atresia, tonsillitis, epistaxis, aspiration. - Lower respiratory tract: Broncheolitis, Bronchopneumonia, Asthma, cystic fibrosis • Child with gastro-intestinal disorders: <ul style="list-style-type: none"> - Diarrheal diseases, gastro-esophageal reflux. - Hepatic disorders: Hepatitis, Indian childhood cirrhosis, liver transplantation. - Malabsorption syndrome, Malnutrition • Child with renal/ urinary tract disorders: Nephrotic syndrome, Nephritis, Hydronephrosis, hemolytic-uremic syndrome, kidney transplantation • Child with cardio-vascular disorders: <ul style="list-style-type: none"> - Acquired: Rheumatic fever, Rheumatic heart disease, - Congenital: Cyanotic and acyanotic • Child with endocrine/metabolic disorders: Diabetes insipidus, Diabetes Mellitus – IDDM, NIDDM, hyper and hypo thyroidism, phenylketonuria, galactosemia • Child with Neurological disorders: Convulsions, Meningitis, encephalitis, guillian- Barre syndrome • Child with oncological disorders: Leukemias, Lymphomas, Wilms’ tumor, nephroblastomas, neuroblastomas, Rhabdomyosarcoma, retinoblastoma, hepatoblastoma, bone tumors • Child with blood disorders: Anemias, thalassemias, hemophilia, polycythemia, thrombocytopenia, and disseminated intravascular coagulation • Child with skin disorders • Common Eye and ENT

Unit	Hours	Content
III	35	<p>Assessment(including interpretation of various invasive and non-invasive diagnostic procedures), treatment modalities including cosmetic surgery and nursing interventions in selected pediatric surgical problems/ Disorders</p> <ul style="list-style-type: none"> • Gastrointestinal system: Cleft lip, cleft palate and conditions requiring plastic surgery, Tracheo esophageal fistula/atresia, Hirschsprungs' disease/megacolon, malrotation, intestinal obstruction, duodenal atresia,
		<p>gastrochisis, exomphalus, anorectal malformation, omphalocele, diaphragmatic hernia</p> <ul style="list-style-type: none"> • Anomalies of the nervous system: Spina bifida, Meningocele, Myelomeningocele, hydrocephalus • Anomalies of the genito-urinary system: Hypospadias, Epispadias, Undescended testes, Exstrophy bladder • Anomalies of the skeletal system • Eye and ENT disorders <p>Nursing management of the child with traumatic injuries: General principles of managing Pediatric trauma</p> <ul style="list-style-type: none"> - Head injury, abdominal injury, poisoning, foreign body obstruction, burns - & Bites • Child with oncological disorders: Solid tumors of childhood, Nephroblastoma, Neuro blastoma, Hodgkin's/Non Hodgkin's Lymphoma, Hepatoblastoma, Rhabdomyosarcoma • Management of stomas, catheters and tubes • Management of wounds and drainages

Practical

Total = 1050 Hours
1 Week = 30 Hours

- Field visits:

S. No.	Dept./ Unit	No. of Week	Total Hours
1	Pediatric medicine ICU	5	150 Hours
2	Pediatric surgical ICU	5	150 Hours
3	NICU	4	120 Hours
4	Pediatric OT	2	60 Hours
5	Pediatric medicine ward	6	180 Hours
6	Pediatric surgery ward	6	180 Hours
7	Emergency/Casualty	5	150 Hours
8	Field visits*	2	60 Hours
	Total	35Weeks	1050 Hours

*Child care center, Anganwadi, play school, Special schools for challenged children, Juvenile court, UNICEF, Orphanage, Creche, SOS village

Essential

I. Procedures Observed:

- Echo cardiogram
- Ultrasound head
- ROP screening (Retinopathy of prematurity)
- Any other

II. Procedures Assisted

- Advanced neonatal life support
- Lumbar Puncture
- Arterial Blood Gas
- ECG Recording
- Umbilical catheterization – arterial and venous
- Arterial B P monitoring
- Blood transfusion- exchange transfusion full and partial
- IV cannulation & therapy
- Arterial catheterization
- Chest tube insertion
- Endotracheal intubation
- Ventilation
- Insertion of long line
- Assist in surgery

III. Procedures Performed:

- Airway Management
 - Application of Oro Pharyngeal Airway
 - Oxygen therapy
 - CPAP(Continuous Positive Airway Pressure)
 - Care of Tracheostomy
 - Endotracheal Intubation
- Neonatal Resuscitation
- Monitoring of Neonates – clinically & with monitors, CRT(Capillary Refill Time), assessment of jaundice, ECG
- Gastric Lavage
- Setting of Ventilators
- Phototherapy
- Assessment of Neonates: Identification & assessment of risk factors, APGAR Score, gestation age, Anthropometric assessment, Weighing the baby, Newborn examination, detection of life threatening congenital abnormalities,
- Admission & discharge of neonates
- Feeding - management of breast feeding, artificial
- Thermoregulation- Axillary temperature, Kangaroo Mother Care (KMC), Use
- Administration of Drugs: I/M, IV injection, IV Cannulation & fixation infusion pump, Calculation of dosages, Neonatal formulation of drugs, use of tuberculin/ insulin s
- Procedures for prevention of infections: Hand v
- Collection of specimens

- Setting, Use & maintenance of basic equipment: Ventilator, O2 analyzer, monitoring equipment, Photo therapy unit, Flux meter, Infusion pump, Radiant warmer, incubator, Centrifuge machine, Bilimeter, Refractometer, laminar flow

IV. Other Procedures:

CLINICAL SPECIALITY – II

OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement - II Year

Theory : 150 Hrs.

Practical : 1050 Hrs.

Total : 1200 Hrs.

Course Description

This course is designed to assist the student in developing expertise and in- depth understanding in the field of Obstetric and gynecological Nursing .It will help the student to develop advanced nursing skills for nursing interventions in various obstetrical and gynecological conditions. It will further enable the students to function as midwifery nurse practitioner/ specialist, educator, manager and researcher in the field of obstetric and gynecological nursing.

Objectives

At the end of the course, the student will be able to:

1. Describe the epidemiology, etiology, pathophysiology and diagnostic assessment of women with obstetric and gynaecological conditions
2. Perform physical, psychosocial, cultural & spiritual assessment
3. Demonstrate competence in caring for women with obstetrical and gynaecological conditions
4. Demonstrate competence in caring for high risk newborn.
5. Identify and Manage obstetrical and neonatal emergencies as per protocol.
6. Practice infection control measures
7. Utilize recent technology and various diagnostic, therapeutic
8. Demonstrate skill in handling various equipments/gadgets used for obstetrical, gynaecological and neonatal care
9. Teach and supervise nurses and allied health workers.
10. Design a layout of speciality units of obstetrics and gynecology
11. Develop standards for obstetrical and gynaecological nursing practice.
12. Counsel women and families
13. Incorporate evidence based nursing practice and identify the areas of research in the field of obstetrical and gynaecological nursing
14. Function as independent midwifery nurse practitioner

Contents Outline

Unit	Hours	Content
I	25	<p>Management of problems of women during pregnancy</p> <ul style="list-style-type: none"> % Risk approach of obstetrical nursing care , concept & goals. % Screening of high-risk pregnancy, newer modalities of diagnosis. % Nursing Management of Pregnancies at risk-due to obstetrical complication <ul style="list-style-type: none"> • Pernicious Vomiting. • Bleeding in early pregnancy, abortion, ectopic pregnancy, and gestational trophoblastic diseases. • Hemorrhage during late pregnancy, ante partum hemorrhage, Placenta praevia, abruptio placenta. • Hypertensive disorders in pregnancy, pre-eclampsia, eclampsia, Hemolysis Elevated liver enzyme Low Platelet count (HELLP) • Iso-immune diseases. Rh and ABO incompatibility • Hematological problems in pregnancy. • Hydramnios-oligohydramnios • Prolonged pregnancy- post term, post maturity. • Multiple pregnancies. • Intra uterine infection & pain during pregnancy. • Intra Uterine Growth Retardation(IUGR), Premature Rupture of Membrane(PROM), intra uterine death
II	15	<p>Pregnancies at risk-due to pre-existing health problems</p> <ul style="list-style-type: none"> Metabolic conditions. Anemia and nutritional deficiencies Hepatitis Cardio-vascular disease. Thyroid diseases. Epilepsy. Essential hypertension Chronic renal failure. Tropical diseases. Psychiatric disorders Infections Toxoplasmosis Rubella Cytomegalo virus Herpes (TORCH); Reproductive Tract Infection(RTI);STD; HIV/AIDS, Vaginal infections; Leprosy, Tuberculosis Other risk factors: Age- Adolescents, elderly; unwed mothers, sexual abuse, substance use Pregnancies complicating with tumors, uterine anomalies, prolapse, ovarian cyst

Practicals

Total = 1050 Hours

1 Week = 30 Hours

S.No.	Deptt./ Unit	No. of Week	Total Hours
1	Antenatal OPD including Infertility clinics/Reproductive medicine, Family welfare and	6	180 Hours
2	Antenatal and Postnatal ward	6	180 Hours
3	Labour room	6	180 Hours
4	Neonatal Intensive Care Unit	3	90 Hours
5	Obstetric/Gynae Operation Theatre	4	120Hours
6	Gynae Ward	4	120 Hours
7	CHC, PHC, SC	6	180 Hours
	Total	35 Weeks	1050 Hours

Essential Obstetrical And Gynecological Skills

Procedure Observed

- Assisted Reproductive Technology procedures
- Ultra sonography
- Specific laboratory tests.
- Amniocentesis.
- Cervical & vaginal cytology.
- Fetoscopy.
- Hysteroscopy.
- MRI.
- Surgical diathermy.
- Cryosurgery.

Procedures Assisted

- Operative delivery
- Abnormal deliveries-Forceps application, Ventouse, Breech
- Exchange blood transfusion
- Culdoscopy.
- Cystoscopy
- Tuboscopy
- Laparoscopy.
- Endometrial Biopsy
- Tubal patent test
- Chemotherapy
- Radiation therapy
- Medical Termination of Pregnancy.
- Dilatation and Curettage

Procedures Performed

- History taking.

- Physical Examination-General
- Antenatal assessment. – 20
- Pelvic examination
- Assessment of risk status.
- Assessment of Intra uterine foetal well-being.kick chart and foetal movement chart, Doppler assessment, Non Stress Test, Contraction stress test(Oxytocin challenge test)
- Universal precautions- Disposal of biomedical waste.
- Per Vaginal examination and interpretation (early pregnancy, labour, post partum).
- Utilization of Partograph
- Medical & Surgical induction(Artificial rupture of membranes).
- Vacuum extraction
- Conduct of delivery.
- Prescription and administration of fluids and electrolytes through intravenous route.
- Application of outlet forceps, delivery of breach – Burns Marshall, Loveset manoeuvre
- Repair of tears and Episiotomy suturing.
- Vacuum extraction
- controlled cord traction, Manual removal of placenta, placental examination,
- Manual vacuum aspiration
- Postnatal assessment.- 20
- Management of breast engorgement
- Thrombophlebitis (white leg)
- Postnatal counseling.
- Reposition of inversion of uterus.
- Laboratory tests: Blood- Hb, Sugar, Urine-albumin,sugar
- Breast care, breast exam, and drainage breast abscess.
- Postnatal exercise.
- Assessment –New born assessment; physical and neurological, Apgar score, high-risk newborn, Monitoring neonates; Clinically and With monitors, Capillary refill time, Assessment of jaundice, danger signs
- Anthropometric measurement
- Neonatal resuscitation
- Gastric Lavage
- Care of newborn in multi channel monitor and ventilator.
- Care of newborn in radiant warmer and incubator.
- Kangaroo mother care.
- Assisting mother with exclusive Breast-feeding
- Feeding technique: Katori, spoon, naso/orogastric, Total Parenteral nutrition
- Assesment, calculation and administration of fluids and medications:
 - Oral
 - I.D.
 - I.M.
 - I.V.- Securing IV line, infusion pump
- Administration of drug per rectum
- Capillary blood sample collection.
- Oxygen therapy.
- Phototherapy.

- Chest physiotherapy.
- counseling – Parental, bereavement, family planning, infertility etc
- Setting of operation theatre.
- Trolley and table set up for Obstetrical & gynaecological operations.
- Pap smear.
- Vaginal smear.
- Insertion of pessaries,
- Insertion of IUD and removal.
- Teaching skills
- communication skills
- Prepare referral slips
- Pre transport stabilization
- Networking with other stake holders

COMMUNITY HEALTH NURSING

Placement : II Year

Hours of Instruction
Theory- 150 hours
Practicals- 1050 hours
Total- 1200 hrs

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of community health nursing. It will help students to develop advanced skills for nursing intervention in various aspects of community health care settings. It will enable the student to function as community health Nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of community health nursing.

Objectives

At the end of the course the students will be able to:

1. Appreciate trends and issues related to community health Nursing- reproductive and child health, school health, Occupational health, international health, rehabilitation, geriatric and mental health.
2. Apply epidemiological concepts and principles in community health nursing practice
3. Perform community health assessment and plan health programmes
4. Describe the various components of Reproductive and child health programme.
5. Demonstrate leadership abilities in organizing community health nu
6. Describe the role and responsibilities of community health nurse in various national health and family welfare programmes
7. Participate in the implementation of various national health and family welfare programme
8. Demonstrate competencies in providing family centered nursing care independently
9. Participate/Conduct research for new insights and innovative solutions to health problems
10. Teach and supervise nurses and allied health workers.
11. Design a layout of sub center/Primary health center/Community health center and develop standards for community health nursing practice.

PSYCHIATRIC (MENTAL HEALTH) NURSING

Placement: II Year
Practicals

Hours of Instruction

Theory 150 hrs Practical
1050hrs Total : 1200
Hours

Course Description

This course is designed to assist students in developing expertise and in-depth understanding in the field of Psychiatric Nursing. It will help students to develop advanced skills for nursing intervention in various psychiatric conditions. It will enable the student to function as psychiatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Psychiatric nursing

Object ives

At the end of the course the students will be able to:

1. Apply the nursing process in the care of patients with mental disorders in hospital and community
2. Demonstrate advanced skills/competence in nursing management of patients with mental disorders
3. Identify and care for special groups like children, adolescents, women, elderly, abused and neglected, people living with HIV/AIDS.
4. Identify and manage psychiatric emergencies.
5. Provide nursing care to critically ill patients with mental disorders
6. Utilize the recent technology and various treatment modalities in the management of patients with mental disorders
7. Demonstrate skills in carrying out crisis intervention.
8. Appreciate the legal and ethical issues pertaining to psychiatric nursing.
9. Identify areas of research in the field of psychiatric nursing.
10. Prepare a design for layout and describe standards for management of Psychiatric units/emergency units/hospitals
11. Teach psychiatric nursing to undergraduate students& in-service nurses.
